## History Alive Chapter 19 Geography Challenge:

Democracy and Education Reconsidered Jim Garrison, Stefan Neubert, Kersten Reich, 2015-12-22 Democracy and Education Reconsidered highlights the continued relevance of John Dewey's Democracy and Education while also examining the need to reconstruct and recontextualize Dewey's educational philosophy for our time. The authors propose ways of revising Dewey's thought in light of the challenges facing contemporary education and society and address other themes not touched upon heavily in Dewey's work such as racism, feminism, post-industrial capitalism, and liquid modernity. As a final component, the authors integrate Dewey's philosophy with more recent trends in scholarship including pragmatism, post-structuralism, and the works of other key philosophers and scholars.

**Zuni Origins** David A. Gregory, David R. Wilcox, 2015-11-01 A Choice Outstanding Academic Title. The Zuni are a Southwestern people whose origins have long intrigued anthropologists. This volume presents fresh approaches to that question from both anthropological and traditional perspectives, exploring the origins of the tribe and the influences that have affected their way of life. Utilizing macro regional approaches, it brings together many decades of research in the Zuni and Mogollon areas, incorporating archaeological evidence, environmental data, and linguistic analyses to propose new links among early Southwestern peoples. The findings reported here postulate the differentiation of the Zuni language at least 7,000 to 8,000 years ago following the initial peopling of the hemisphere and both formulate and test the hypothesis that many Mogollon populations were Zunian speakers. Some of the contributions situate Zuni within the developmental context of Southwestern societies from Paleoindian to Mogollon. Others test the Mogollon-Zuni hypothesis by searching for contrasts between these and neighboring peoples and tracing these contrasts through macro regional analyses of environments, sites, pottery, basketry, and rock art. Several studies of late prehistoric and protohistoric settlement systems in the Zuni area then express more cautious views on the Mogollon connection and present insights from Zuni traditional history and cultural geography. Two internationally known scholars then critique the essays, and the editors present a new research design for pursuing the question of Zuni origins. By taking stock and synthesizing what is currently known about the origins of the Zuni language and the development of modern Zuni culture, *Zuni Origins* is the only volume to address this subject with such a breadth of data and interpretations. It will prove invaluable to archaeologists working throughout the North American Southwest as well as to others struggling with issues of ethnicity, migration, incipient agriculture, and linguistic origins.

*History of Medina County and Ohio*, 1881      **Evolutionary Perspectives on Social Psychology**

Virgil Zeigler-Hill, Lisa L. M. Welling, Todd K. Shackelford, 2015-05-06. This wide ranging collection demonstrates the continuing impact of evolutionary thinking on social psychology research. This perspective is explored in the larger context of social psychology which is divisible into several major areas including social cognition, the self, attitudes and attitude change, interpersonal processes, mating and relationships, violence and aggression, health and psychological adjustment, and individual differences. Within these domains, chapters offer evolutionary insights into salient topics such as social identity, prosocial behavior, conformity, feminism, cyberpsychology, and war. Together, these authors make a rigorous argument for the further integration of the two diverse and sometimes conflicting disciplines. Among the topics covered: How social psychology can be more cognitive without being less social; How the self-esteem system functions to resolve important interpersonal dilemmas; Shared interests of social psychology and cultural evolution; The evolution of stereotypes; An adaptive socio-ecological perspective on social competition and bullying; Evolutionary game theory and personality. Evolutionary Perspectives on Social Psychology has much to offer students and faculty in both fields as well as evolutionary scientists outside of psychology. This volume can be used as a primary text in graduate courses and as a supplementary text in various upper level undergraduate courses.

Mapping LGBTQ Spaces and Places Marianne Blidon, Stanley D. Brunn, 2022-07-11. This book addresses LGBTQ issues in relation to, among others, law and policy, mobility and migration, children and family, social well-being and identity, visible and invisible landscapes, teaching and instruction, parades, arts and cartography, and mapping. A variety of research methods are used to explore identities, communities, networks, and landscapes, all of which can be used in subsequent research and classroom instruction and disciplinary and interdisciplinary levels. This extensive book stimulates future pioneering research ventures in rural and urban settings about existing and proposed LGBTQ policies, individual and group mapping, visible and invisible spaces, and the construction of public and private spaces. Through the methodologies and rich bibliographies, this book provides a rich source for future comparative research of scholars working in social work, NGOs, and public policy and community networking and development.
