Narratology is concerned with the study of narratives but surprisingly it does not usually distinguish between original and  
translated texts This lack of distinction is regrettable In recent years the visibility of translations and translators has become  
a widely discussed topic in Translation Studies yet the issue of translating a novel's point of view has remained relatively  
unexplored It seems crucial to ask how far a translator's choices affect the novel's point of view and whether characters or  
narrators come across similarly in originals and translations This book addresses exactly these questions It proposes a  
method by which it becomes possible to investigate how the point of view of a work of fiction is created in an original and  
adapted in translation It shows that there are potential problems involved in the translation of linguistic features that  
constitute point of view and that this has an impact on the way works are translated **Word** ,1967 , **Scientific**
