

## Lesson #1: Combining Forces

### Concept: Magnitude

#### Definition:

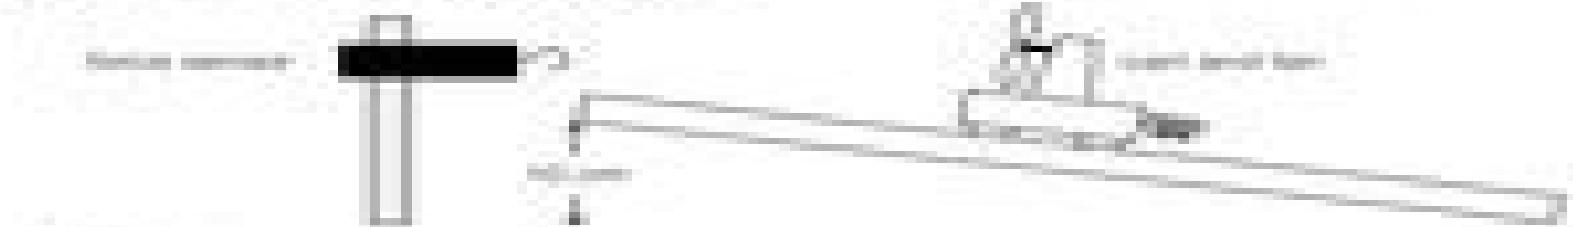

How powerful and how fast is the force? or how strong is the force? Forces can be as small and have very little effect or they can be large and have a large effect.

#### Requirements:

Force arrows, ruler and blank graph paper.

#### Magnitude of Force:

Not just the force but when you combine two forces the effect will be... (about the force) when trying to move objects. (about the force and the effect the total force) The total force is the sum of the individual forces. (about the force and the effect the total force is the sum of the individual forces. (about the force and the effect the total force is the sum of the individual forces.)

#### Directions:

1. Worked out with the first part, add on the second part of the combination. (about the combination) together and then following diagram. (the sum of the force) (the resultant diagram) forces in the direction shown the arrows.

#### What happened to the resultant?

2. Notice how in the last diagram when both the vectors are vertical, when force goes up the force has the same effect. (about the force and the effect the total force is the sum of the individual forces.)
