

## **Temperature Patterns (Lett Part 2)**

Answer the following questions by comparing the temperature charts on the temperature patterns worksheet between Canada's major climate regions. Compare temperature control factors that are most responsible for the patterns shown between (1) latitude, (2) landmass characteristics, (3) wind patterns, and (4) altitude. Your study can also extend beyond the major climate regions. Then select one climate control factor and is responsible factors trying to answer this questions.

1. Which factor primarily explains the differences among patterns in Canada's climate? Landmass controls
2. Why do the climate charts illustrate differences in Canada's climate? This is due to landmass controls.
3. Why does the Arctic have much colder winters? It is due to landmass controls. High latitude characteristics cause cooling.
4. Although there are similarities between Canadian climate charts, why are there differences among patterns? Wind patterns
5. Which factor primarily explains the differences among patterns between Canada and the United States? Climate factors explain the patterns. The temperature differences between Canada and the U.S. are in latitude.
6. Which factor primarily explains the differences among patterns between Canada and the United States? Landmass controls. This is because there is more water along the coast.
7. Why does the West have a wider temperature range than Canada? Due to the latitude. The West has a wider (colder) temperature range than Canada.
8. What explains the differences among patterns between Canada and the United States? The differences among patterns between Canada and the United States.
