2. Who uses accounting information and why?

Businesses use accounting to: analyze transactions, handle routine bookkeeping tasks, and structure information so it can be used to evaluate the performance and health of the business. Used by creditors, investors, and both decisions makers inside and outside of organizations use it to: allocate resources, evaluate performance, and determine a company's profitability.

3. What are the important influences on accounting?

Three particularly important factors that influence the environment in which accounting operates are the development of "generally accepted accounting principles" (GAAP), international business, and ethical considerations.

4. What is the role of ethics in accounting?

Maintaining high ethical standards is important in accounting because accounting decisions often impact real-world economic decisions. Accountants have a moral and economic incentive to be ethical and to conduct themselves ethically. Accountants are the scorekeepers, so they must remain unbiased.
