Managing Foodservice And Food Safety:

Managing Foodservice and Food Safety Susan Davis Allen, Becky Rude, 2012-01-01 Today Certified Dietary Managers are responsible for the daily operations of their department while helping the facility fulfill its mission and goals They coordinate the service of food and nourishments among various departments such as dining services and nursing Certified Dietary Managers ensure that clients are satisfied with their dining experience and that the meals are meeting their nutritional and emotional needs In addition they oversee food safety the inventory and ordering of food equipment and supplies and arrange for the routine maintenance and upkeep of the foodservice equipment and facilities Certified Dietary Managers are generally responsible for all administrative and human resource functions of the foodservice department including recruiting new employees and monitoring employee performance and training This textbook walks you through the daily management operations of your foodservice department Preface

Food Safety Culture Frank Yiannas, 2008-12-10 Food safety awareness is at an all time high new and emerging threats to the food supply are being recognized and consumers are eating more and more meals prepared outside of the home Accordingly retail and foodservice establishments as well as food producers at all levels of the food production chain have a growing responsibility to ensure that proper food safety and sanitation practices are followed thereby safeguarding the health of their guests and customers Achieving food safety success in this changing environment requires going beyond traditional training testing and inspectional approaches to managing risks It requires a better understanding of organizational culture and the human dimensions of food safety To improve the food safety performance of a retail or foodservice establishment an organization with thousands of employees or a local community you must change the way people do things You must change their behavior In fact simply put food safety equals behavior When viewed from these lenses one of the most common contributing causes of food borne disease is unsafe behavior such as improper hand washing cross contamination or undercooking food Thus to improve food safety we need to better integrate food science with behavioral science and use a systems based approach to managing food safety risk The importance of organizational culture human behavior and systems thinking is well documented in the occupational safety and health fields However significant contributions to the scientific literature on these topics are noticeably absent in the field of food safety
