**The Game Believes in You** Greg Toppo, 2025-06-25 What if schools from the wealthiest suburban nursery school to the grittiest urban high school thrummed with the sounds of deep immersion? More

and more people believe that can happen with the aid of video games. Greg Toppo's *The Game Believes in You* presents the story of a small group of visionaries who for the past 40 years have been pushing to get game controllers into the hands of learners. Among the game revolutionaries you'll meet in this book: A game designer at the University of Southern California leading a team to design a video game version of Thoreau's *Walden Pond*; A young neuroscientist and game designer whose research on Math Without Words is revolutionizing how the subject is taught especially to students with limited English abilities; A Virginia Tech music instructor who is leading a group of high school aged boys through the creation of an original opera staged totally in the online game *Minecraft*; Experts argue that games do truly believe in you. They focus, inspire and reassure people in ways that many teachers can't. Games give people a chance to learn at their own pace, take risks, cultivate deeper understanding, fail and want to try again right away and ultimately succeed in ways that too often elude them in school. This book is sure to excite and inspire educators and parents as well as provoke some passionate debate.
