*Advances in the Evolutionary Ecology of Termites* Alberto Arab, Solange Del Carmen Issa Ponce, Daniel

Aguilera-Olivares, 2023-08-16 Termites are eusocial insects that live in colonies composed of hundreds to millions of individuals. Their colonies are mainly organized into reproductive and non reproductive castes which have specific tasks such as nest construction, foraging, reproduction, brood care and colony defense. The evolution of the symbiotic association between termites and microorganisms allows them to decompose ingested lignocellulose from plant substrates such as wood, including herbivore dung and soil humus, making them important insect decomposers that play a crucial role in ecosystem functioning by contributing to litter decomposition, soil formation and nutrient cycling. On the other hand, termites have recently been classified as eusocial cockroaches which have gained increasing attention in evolutionary studies to understand the transition to eusociality from subsocial wood roaches. This current growing interest in termite research calls for a collection dedicated to these fascinating insects.

*Multilingualism in European Language Education* Cecilio Lapresta-Rey, Ángel

Huguet, 2019-05-09 This book explores how different European education systems manage multilingualism. Each chapter focuses on one of ten diverse settings: Andorra, Asturias, the Basque Country, Catalonia, England, Finland, France, Latvia, the Netherlands, and Romania, and considers how its education system is influenced by historical, sociolinguistic, and legislative and political processes, and how languages are handled within the system, stressing the challenges and opportunities in each area of study. The chapters provide the reader with insights around three key aspects: the management of the guarantee of the rights of regional language minorities, the incorporation of the language background inherited by immigrants living in Europe, whether they are European citizens or not, and the need to promote the learning of international languages. Individually, the chapters offer deep insights into a specific education system, and together, the studies allow for a comparison and holistic understanding of multilingualism in European education.

International Perspectives on Knowledge Integration Thomas Lehmann, 2020-05-18 Interest in knowledge integration grew considerably in recent years particularly within the realm of pre service teacher education However studies on the topic conceptualize knowledge integration in diverse ways For example it may be conceived as a specific coherence building learning process which involves not only acquiring but interrelating knowledge of different types e g theoretical and practical or from different domains which together constitute a teacher's or educational specialist's professional knowledge base e g content knowledge pedagogical knowledge pedagogical content knowledge knowledge about using technologies for learning and instruction etc Furthermore knowledge integration also refers to the meaningful application of knowledge of different types and from various domains in order to act professionally and to teach successfully In many countries however future teachers and educational specialists often struggle with knowledge integration because the task of integrating knowledge across domains from various courses and from practical training is left largely to the individuals Thus the efficacy and quality of higher education programs particularly in pre service teacher education could be improved through careful attention to knowledge integration International Perspectives on Knowledge Integration aims at facilitating the consideration of knowledge integration in teacher training and higher education in both research and practice Specifically it explores

theoretical conceptions and methods and reports on original research and good practices for fostering knowledge integration It is thus of interest to researchers faculty board members and lecturers concerned with teacher training and higher education as well as to student teachers and students of pedagogy education and educational psychology **"Code of Massachusetts regulations, 2015"** ,2015 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 *Teacher Education and Teacher Professional Development in the COVID-19 Turn* Nur Arifah Drajati,Kristian Adi Putra,2022-11-29 These proceedings present a selection of papers from the ICTTE 2021 conference While face to face classroom instruction is brought back there are a lot of lessons learned from the COVID 19 pandemic that schools teacher training and education institutions and government have to take into account There is a need to reconsider what additional knowledge and skills pre service teachers and in service teachers need to be prepared for to anticipate such a similar unexpected situation in the future Additionally there is also a need to listen to in service teacher experiences during the emergency remote teaching and integrate the positive lessons that they have gained such as the use of technology into the current post pandemic face to face classroom instruction This proceeding is designed for teacher educators researchers in service teachers and pre service teachers in the field of language education math and science education and social science education who are interested in these topics **ECEL2015-14th European**
