## Example Code Cobol:

New Ways of Running Batch Applications on z/OS: Volume 4 IBM IMS Denis Gaebler,Alex Louwe Kooijmans,Elsie Ramos,IBM Redbooks,2014-05-28 Mainframe computers play a central role in the daily operations of many of the world s largest corporations Batch processing is still a fundamental mission critical component of the workloads that run on the mainframe A large portion of the workload on IBM z OS systems is processed in batch mode This IBM Redbooks publication is the fourth volume in a series of four They address new technologies introduced by IBM to facilitate the use of hybrid batch applications that combine the best aspects of Java and procedural programming languages such as COBOL This volume focuses on the latest enhancements in IBM IMSTM batch support IMS has been available to clients for 45 years as IMS Transaction Manager IMS Database Manager or both The audience for this book includes IT architects and application developers with a focus on batch processing on the z OS platform *Modernizing Legacy Systems* Robert C. Seacord,Daniel Plakosh,Grace A. Lewis,2003 Most organizations rely on complex enterprise information systems EISs to codify their business practices and collect process and analyze business data These EISs are large heterogeneous distributed constantly evolving dynamic long lived and mission critical In other words they are a complicated system of systems As features are added to an EIS new technologies and components are selected and integrated In many ways these information systems are to an enterprise what a brain is to the higher species a complex poorly understood mass upon which the organism relies for its very existence To optimize business value these large complex systems must be modernized but where does one begin This book uses an extensive real world case study based on the modernization of a thirty year old retail system to show how modernizing legacy systems can deliver significant business value to any organization **Practical MVS JCL Examples** James G. Janossy,1993-02-18 Revised to be a companion reference to Gary Brown s System 370 390 JCL known as the JCL Bible it contains a significant amount of actual JCL examples in the context of a single large model program added upon as each new feature of JCL is introduced Details the latest enhancements from IBM including MVS ESA and SMS Demonstrates debugging techniques through JCL Illustrations are in TSO ISPF with JCL to make the book s screen examples look exactly like those seen on a computer Structured Programming with COBOL Examples Earl H. Parsons,2002-11 As the conversion of legacy systems continues the ability to understand embedded business rules becomes more and more critical This ability is directly related to the structure of the programs within those systems We also see the need to teach structured programming to a new generation of programmers who must maintain the billions of lines of existing COBOL code The ultimate purpose of this text is to discuss how to judge the level of structure of a program We do this by defining structured programming and then discussing how a structured program can be built through the application of the concepts of coupling and cohesion We also show how embedded business rules of the program can be separated from the data and presentation functions The reader will be able to use to these skills to judge and to improve the structure of a new program or an existing
