Whitaker's Cumulative Book List, 1982 Safety at Work John R. Ridley, 2014-05-15

Safety at Work features articles from 25 specialist contributors written in association with the Institution of Occupational Safety and Health. This third edition of the book contains revisions to reflect developments in health and safety legislation and to rationalize the structure of some of the chapters. This book is organized into 31 chapters. Several chapters from the second edition were revised. Chapters on occupational safety law were combined into one chapter. The Management Techniques and Behavioral Science chapters were also combined in to Management of Risk to reflect the growing importance of broad based risk control strategies. A chapter on the employer's obligations for safety was included to replace the behavioral science techniques chapter and the practical day to day engineering application of physics and chemistry techniques was retitled Engineering science. A new chapter on the safe use of chemicals has also been added to cover with the important field covered by the Control of Substances Hazardous to Health Regulations 1988. This book will be of interest to occupational safety professionals and others interested in workplace safety.

Conservation of Historic Buildings Bernard Melchior Feilden, 1982. Since its publication in 1982 Sir Bernard Feilden's *Conservation of Historic Buildings* has become the standard text for architects and others involved in the conservation of historic structures. Leading practitioners around the world have praised the book as being the most significant single volume on the subject to be published. Now the book is re-issued with revisions in softcover so that a greater audience can enjoy this classic book. The result of the lifetime's experience of one of the world's leading architectural conservators, the book comprehensively surveys the fundamental principles of conservation in their application to historic buildings and provides the basic information needed by architects engineers and surveyors for the solution of problems of architectural conservation in almost every climatic region of the world. This softcover edition is organised into three complementary parts: in the first the structure of buildings is dealt with in detail, the second focuses attention on the causes of decay and the materials they affect and the third considers the practical role of the architect involved in conservation and rehabilitation. As well as being essential reading for architects and others concerned with conservation many lay people with various kinds of responsibility for historic buildings will find this clearly written jargon free work a fruitful source of guidance and information. Gain a valuable insight into the building conservation world. Benefit from the world's leading authority. Easy to understand jargon free source of guidance and information.
