CASIO

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

Starting second hand movement, and digital display

To correct the factory setting, the watch is shipped from the factory with its functions disabled. Pressing any one of the watch's three buttons will activate its functions, which will cause the second hand to start moving and the digital display to activate.

This watch does not have a Time Zone that corresponds to the Greenwich Mean Time differential of -3.5 hours. Because of this, the radio-controlled atomic timekeeping function will not display the correct time for Newfoundland, Canada.

Your watch switches automatically between Standard Time and Daylight Saving Time (summer time). Note, however, that switching cannot be performed correctly if the watch is not able to receive the time calibration signal. If you notice that the current time is not displayed properly, use the procedure under "To perform manual receive" or "To set the time and date manually" to correct it.

General Guide

- Press (C) to change from mode to mode.
- About 1.5 seconds after you enter the Dual Time Mode, Alarm Mode, or Hand Setting Mode the hands will move the position that indicates the current setting of the mode. You cannot change to another mode while the hands are moving. To change to another mode, either press (C) before the hands start to move, or wait until the hands stop before pressing (C).
- In Timekeeping Mode (except when a setting screen is on the display), press (C) to illuminate the face of the watch.

Press (C)

About This Manual

Deposited: 1:00 second hand

- Button operations are indicated using the letters shown in the illustrations.
- Each section of this manual provides you with the information you need to perform operations in each mode. Function details and technical information can be found in the "Reference" section.

Radio-controlled Atomic Timekeeping

This watch receives a time calibration signal and updates its time setting accordingly. The time calibration signal includes both Standard Time and Daylight Saving Time (summer time) data.

- The watch is designed to pick up the time calibration signal transmitted in the United States (Fort Collins, Colorado) and the time calibration signals transmitted in Japan, the U.S. time calibration signal can be picked up by the watch while in North America.
- The term "North America" in this manual refers to the area that consists of Canada, the continental United States, and Mexico.

Current Time Setting

This watch adjusts its time setting automatically in accordance with a time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to specify your Home Time Zone, which is the time zone where you will normally use the watch. For more information, see "To specify your Home Time Zone" below.
- When using the watch outside the range of the time signal transmitter, you have to adjust the current time setting manually as required. See "Timekeeping" for more information about manual time settings.

To specify your Home Time Zone

- In the Timekeeping Mode, hold down (C) until the GMT differential value starts to flash, which indicates the setting screen.
 - The second hand will move at high speed to the 12 o'clock position, where it will stop.
 - The GMT differential value indicates the time difference in hours between Greenwich Mean Time and the currently selected time zone.
 - The DST indicator indicates that Daylight Saving Time (summer time) is turned on for the currently selected time zone.

- Use (L) to select the time zone you want to use as your Home Time Zone.
 - 5.0 (DST) -4.0: New York, Boston, Montreal, Detroit, Houston, Phoenix City, Havana, Lima, Bogota
 - 4.0 (DST) -3.0: Chicago, Mexico City, Winnipeg, Dallas/Fort Worth, New Orleans
 - 3.0 (DST) -2.0: Denver, Edmonton, El Paso
 - 2.0 (DST) -1.0: Los Angeles, Vancouver, San Francisco, Las Vegas, Seattle/Tacoma, Dawson City
 - 1.0 (DST) -0.0: Anchorage, Rome
 - 0.0 (DST) +0.0: Honolulu, Hanoi
 - +0.0 (DST) +8.0: Hong Kong, Singapore, Kuala Lumpur, Beijing, Taipei, Manila, Perth, Makassar
 - +8.0 (DST) +9.0: Tokyo, Seoul, Pyongyang

- Press (C) to exit the setting screen.
 - The second hand will advance at high speed to the correct position and resume normal movement from there.
 - Normally, your watch should show the correct time as soon as you specify your Home Time Zone. If it does not, it should adjust automatically after the next auto receive operation (in the middle of the night). You can also perform manual receive or you can set the time manually.

- Selecting -5.0, -4.0, -3.0, -2.0, -1.0, -0.0, +0.0, or +8.0 (DST is turned on) as your Home Time Zone automatically turns on auto receive. When auto receive is turned on and you are within the reception range, the watch will automatically receive the time calibration signal from the applicable transmitter (in the middle of the night) and update its settings accordingly. For information about the relationship between time zones (GMT differential values) and transmitters, see "Home Time Zones and Transmitters".
- See the maps under "Reception Ranges" for information about the reception ranges of the signal.
- If you are in an area that does not use Daylight Saving Time (summer time), turn off the DST setting.
- Even if the time calibration signal is received correctly, there are some times when the analog hands may not indicate the correct time. If this happens, use the procedures under "Adjusting the Home Position" to check the home positions of the hands, and make adjustments as required.

Time Calibration Signal Reception

There are two different methods you can use to receive the time calibration signal: auto receive and manual receive.

Auto Receive

With auto receive, the watch receives the time calibration signal automatically up to six times a day. When any auto receive is initiated, the remaining auto receive operations are not performed. For more information, see "About Auto Receive".

Manual Receive

Manual receive lets you start a time calibration receive operation with the press of a button. For more information, see "To perform manual receive".

Important

- When getting ready to receive the time calibration signal, position the watch as shown in the nearby illustration, with its 12 o'clock side facing towards a window. Make sure there are no radial objects nearby.

- Make sure the watch is facing the right way.
- Proper signal reception can be difficult or even impossible under the conditions listed below.

describes time interval time of day and frequency calibrations It explains the time and frequency broadcast services that are
available in the United States and other countries and how you can use them Your requirements may be as modest as setting
your watch or as involved as calibrating precision oscillators In either case you should find something of interest in this book
Without realizing it we use time and frequency every day Knowing the correct time allows us to function in an orderly
manner We need to know what time to meet a friend for lunch or to arrive at school or work It s all right to get to church
early but it s embarrassing to walk in during the sermon And we d all be disappointed if we missed our airplane after months
of planning a Hawaiian vacation In these examples knowing the correct time to within a few minutes is usually adequate But
even a few seconds can sometimes be quite important For instance every day hundreds of people drop nickels dimes and
quarters into parking meters coin operated washers and dryers and other machines that keep time Businesses pay thousands
of dollars for the use of a computer s time We all pay telephone bills based on the time we spend using the telephone These
activities all require accurate time Fifteen minutes on a parking meter should really be 15 minutes and not 14 An error in the
meter s timer could mean a parking ticket If we talk on the telephone for 7 minutes we don t want to be billed for 9 or 10
