Carbon and

Coal Gasification J.L. Figueiredo,Jacob A. Moulijn,2012-12-06 Carbon gasification reactions form the basis of many important industrial processes such as the combustion of coal and the production of synthesis gas fuel gases and activated carbons They are also involved in metallurgical processes and in the regeneration of coked catalysts Thus understanding the fundamentals of carbon gasification is of vital importance for further technological development Moreover the subject is of interdisciplinary nature involving chemistry materials science and chemical engineering Therefore it was thought that an Advanced Study Institute would be fruitful in establishing the state of the art in bringing together experts from the various sectors involved and in identifying areas of required research and industrial development Such a meeting was held at Alvor Portugal from the 20th to the 31st May 1985 and the lectures presented the roof are collected in this volume The present volume is organized in seven chapters The Introduction presents the carbon gasification reactions an their relevance for particular processes and industrial uses In the second chapter the structures of carbon and coal are reviewed together with methods of structural chemical and textural characterization
