Provides information on low impact exercise including aerobics movement and water workouts      **Low Impact Training**

Jay Lowder,2022 If you don't like to exercise or find it intimidating low impact training offers so much variety to choose from that you are bound to find a workout you like On the other hand if you're a serious athlete and think low impact training is too easy or won't improve your performance think again Its name implies that it involves a non contact sport or exercise but that's not the case Low impact training is any activity or sport that is easy low impact on your joints For example swimming and cycling are low impact activities In swimming the water supports the body and eliminates joint stress In cycling the rider sits on a saddle and doesn't put undue stress on his or her joints as for example a runner does High impact training is the opposite of low impact training It is a sport or exercise that impacts the joints such as running jumping rope and gymnastics Football is high impact not because there is a physical contact or impact between players but because running and blocking impacts the joints When done properly high impact training improves bone density can burn calories faster and helps improve stability
