Q1. Read the passage carefully

Ants, often overlooked, are among the smallest yet wisest creatures. Observing their lives reveals astounding facts about these industrious insects. They communicate using their antennae, touching each other's feelers as they pass by. Ants live in well-organized colonies in nests or anthills, consisting of numerous rooms and passages. Within these nests, there's a clear division of labour: the queen lays eggs, workers gather food and tend to the young, and soldiers protect the colony. Interestingly, ants also coexist with other creatures like beetles and greenflies, the latter being 'milked' for honeydew. This symbiotic relationship highlights ants' advanced social structure and efficiency. Their community life, marked by hard work, discipline, and loyalty, offers valuable lessons for human societies.

Based on your understanding of the passage, answer the following questions.

(Do any 4)

4*2 = 8 marks

i. What do ants use to communicate with each other?
