*Introduction to Linear Circuit Analysis and Modelling* Luis Moura,Izzat Darwazeh,2005-03-05 Luis Moura and Izzat Darwazeh introduce linear circuit modelling and analysis applied to both electrical and electronic circuits starting with DC and progressing up to RF considering noise analysis along the way Avoiding the tendency of current textbooks to focus either on the basic electrical circuit analysis theory DC and low frequency AC frequency range or on RF circuit analysis theory or on noise analysis the authors combine these subjects into the one volume to provide a comprehensive set of the main techniques for the analysis of electric circuits in these areas Taking the subject from a modelling angle this text brings together the most common and traditional circuit analysis techniques e g phasor analysis with system and signal theory e g the concept of system and transfer function so students can apply the theory for analysis as well as modelling of noise in a broad range of electronic circuits A highly student focused text each chapter contains exercises worked examples and end of chapter problems with an additional glossary and bibliography for reference A balance between concepts and applications is maintained throughout Luis Moura is a Lecturer in Electronics at the University of Algarve Izzat Darwazeh is Senior Lecturer in Telecommunications at University College London previously at UMIST An innovative approach fully integrates the topics of electrical and RF circuits and noise analysis with circuit modelling Highly student focused the text includes exercises and worked examples throughout along with end of chapter problems to put theory into practice
