Hoag, John H. Hoag, 2002 Emphasizing fundamental concepts in the study of economics this textbook features 29 one topic chapters yet highlights the relationships between the ideas discussed in the various chapters Organized around themes like the economic problem price determination behind the supply curve the level of income money and trade the chapters focus on topics like production demand supply market equilibrium price elasticity diminishing returns cost revenue profit perfectly competitive supply monopoly imperfect competition unemployment and inflation gross domestic product price indexes business cycles consumption and investment macro equilibrium government fiscal policy monetary tools and economic policy Arleen Hoag teaches at Owens Community College John Hoag teaches at Bowling Green State University Annotation copyrighted by Book News Inc Portland OR      Introduction to Economics John Roscoe Turner, 2015-06-02 Excerpt from Introduction to Economics This book is an outgrowth of classroom discussions It contains in substance the talks on economics which have been made for the past eleven years to my classes in Cornell and New York Universities No apology is offered for the fact that this volume is limited to a discussion of principles Even the concluding chapters on corporations are designed to exemplify principles The time has long since passed when a single volume can treat exhaustively the whole field of economics I shall be more than content if this work justifies the scope indicated for it in the title Introduction to Economics Designed as an introduction this book will serve as a means to the end of a more intelligent study of economic questions It does not dispense with the necessity of reading the many excellent treatises devoted to the different phases of economics rather it distinctly calls for such readings It merely prepares the mind of the student for the thought contained in the more advanced and specialized works on the subject and the practical applications they reveal At the end of each chapter are appended exercises in the form of questions problems and fallacies the object being to stimulate independent thinking as well as to develop the power of applying what the student has learned In so far as may be the problems are stated in the form in which they appear in practical affairs About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing

It can be of very help to Students of Economics and Finance at the high school as well as the College stage who need to keep some basic understanding of economics if they are to pursue higher studies in the fields of Accountancy Finance or Business Management fields. This book provides a basic foundation for such people and makes them become aware of the various economic concepts and terminologies involved in Economics like human wants their characteristics difference between desires and economic wants scarcity utility consumer surplus consumer equilibrium elasticity of demand and supply indifference curve basic economic activities cost and price marginal utility comparative advantage opportunity cost specialization money and banking insurance and many other related concepts. I hope if the reader goes through some beginning pages of this book he can definitely realize its worth. I referred to the importance of my book to Business people also as they need an understanding of Economics in understanding of the concepts of Supply and Demand the factors involved in and affecting the processes of Market Creation price fixation consumer equilibrium and producer equilibrium and many more facts essential terms for an efficient running of their business. At the end of my Book I provided an extra chapter stressing the need for the conservation of the resources through our acts of controlling of the wants and also by the optimization of the yield from a suitable mix of the input resources. I want to create some awareness among students and other people about the real picture of our economy and the need for saving resources for a better future living atmosphere on our planet.
