brought by phishing attacks These days the use of security software on a PC or laptop is seen as essential However many smartphone users do not yet have the same sense of responsibility even though their devices store personal data private photos Internet banking information or even company data As modern smartphones are often expensive to buy they are also an attractive target for thieves Top quality smartphones cost several hundred Euros As it is not possible to physically prevent them from being stolen they must be made less attractive to thieves Consequently many of today s security products contain not only malware protection but also highly developed theft protection functions which make the device less attractive to thieves e g by locking the device and help the owner to find it again *Outlook* ,2008 Enabling Technology for Simulation Science ,2003 **The Cumulative Book Index** ,1965 A world list of books in the English language **Cumulative Book Index** ,1972 **Electronics Buying Guide** ,2008 Tribute ,2002-02 Cumulated Index to the Books ,1972 Popular Photography ,2007-06 Paperbound Books in Print ,1968 **PC Mag** ,1986-12-09 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **MFI ...** ,1999 **CQ** ,1970 Activities of the Laboratories - National Research Council Canada National Research Council of Canada,1970 **Scientific and Technical Aerospace Reports** ,1993 **Marketing** ,2006 *IEEE/SICE/RSJ International Conference on Multisensor Fusion and Integration for Intelligent Systems* ,1999
