**Handbook of Research on User Interface Design and Evaluation for Mobile Technology** Lumsden, Joanna, 2008-02-28 This book compiles authoritative research from scholars worldwide covering the issues surrounding the influx of information technology to the office environment from choice and effective use of technologies to necessary participants in the virtual workplace Provided by publisher ISI Online Services User Guide, 1986 **Needy Media** Stephen Monteiro, 2025-10-16 What makes our portable networked personal media devices smartphones tablets smartwatches so irresistible Reacting to our touch voice or gaze seizing and keeping our attention with sounds vibrations and screen prompts these objects construct an animated intimacy that builds trust and emotional dependence Needy Media explores how features such as face recognition awareness sensors and touchscreens have developed and intersected tying them to key concepts of psychology language and the body Surveying products and practices across a half century Stephen

Monteiro argues that the appeal is as much about how media devices behave as it is about the information they convey. Monteiro traces a symbiotic overreliance and a neediness between users and devices fostered by personalized aspects of digital materiality. The physical and emotional bonds that emerge, he argues, not only cast our devices as loyal companions adaptable to our needs and idiosyncrasies; they also facilitate the corporate harvesting of massive amounts of personal data in the name of making technology more friendly, intuitive, and individualized. Raising important questions about privacy and power, *Needy Media* seeks answers in the complex and sensitive relationship between interface and body, a coupling that makes the networked object both an essential psychological presence and a lingering concern for our sense of self. **SUGI**

**Supplemental Library User's Guide** Robert P. Hastings, SAS Institute, 1986      **Soft Computing for Intelligent Control and Mobile Robotics** Oscar Castillo, Witold Pedrycz, 2010-10-05 This book describes in a detailed fashion the application of hybrid intelligent systems using soft computing techniques for intelligent control and mobile robotics. Soft Computing (SC) consists of several intelligent computing paradigms including fuzzy logic, neural networks, and bio-inspired optimization algorithms which can be used to produce powerful hybrid intelligent systems. The prudent combination of SC techniques can produce powerful hybrid intelligent systems that are capable of solving real world problems. This is illustrated in this book with a wide range of applications with particular emphasis in intelligent control and mobile robotics. The book is organized in five main parts which contain a group of papers around a similar subject. The first part consists of papers with the main theme of theory and algorithms which are basically papers that propose new models and concepts which can be the basis for achieving intelligent control and mobile robotics. The second part contains papers with the main theme of intelligent control which are basically papers using bio-inspired techniques like evolutionary algorithms and neural networks for achieving intelligent control of non linear plants. The third part contains papers with the theme of optimization of fuzzy controllers which basically consider the application of bio-inspired optimization methods to automate the design process of optimal type 1 and type 2 fuzzy controllers. The fourth part contains papers that deal with the application of SC techniques in time series prediction and intelligent agents. The fifth part contains papers with the theme of computer vision and robotics which are papers considering soft computing methods for applications related to vision and robotics. **Electronics Buying Guide 2006** Consumer Reports (Firm), 2005-09-19 Digital technology is touching all aspects of our lives from cell phones to digital cameras.
