**Achieving Business Success with GIS** Bruce

Douglas, 2008-02-28 Written at a practical level suited to the business audience this exceptional book explores the business

environment of making GIS successful It applies academic rigor to practical and commercial implementation issues and

offers viewpoints from all parties involved in GIS implementation Achieving Business Success with GIS provides tangible

advice ranging from technical and financial to organizational and commercial It is unique in that it does not stop short of

providing without hype or embellishment practical advice and real examples regarding the total cost of ownership of a

project or finance and return investment of GIS products Achieving Business Success with GIS highlights that the use of GIS

technology needs to be focused on the business issues not the technology The book begins by describing the use of GIS in a

global context within a business environment as the background to outlining the need for organizations to have a strategy for

their GIS The book then goes on to explore the elements of a GIS strategy and explains issues which are relevant for such

approaches and how to go about developing it In the closing chapters of this book the process of specifying and tendering for

a GIS are discussed to ensure that the focus of the reader remains on the business issues of the organization This is followed

by examples of the best and worst Geographic Information Systems including a discussion on Google Earth and Web 2.0. The combination of the statistics from the GIS Spatial surveys and the author's consulting experiences make this book an invaluable resource for GIS managers in government, federal, state and local and utilities organisations using GIS and students and lecturers in this field. **Experimental Architecture** Rachel Armstrong, 2019-06-11. In this groundbreaking book, the first to provide an overview of the theory and practice of experimental architecture, Rachel Armstrong explores how interdisciplinary design-led research practices are beginning to redefine the possibilities of architecture as a profession. Drawing on experts from disciplines as varied as information technology, mathematics, poetry, graphic design, scenography, bacteriology, marine applied science and robotics, Professor Armstrong delineates original cutting-edge architectural experiments through essays, quotes, poetry, equations and stories. Written by an acknowledged pioneer of architectural experiment, this visionary book is ideal for students and researchers wishing to engage in experimental practice-based architectural and artistic research. It introduces radical new ideas about architecture and provides ideas and inspiration which students and researchers can apply in their own work and proposals, while practitioners can draw on it to transform their creative assumptions and develop thereby a distinctive edge to stand out in a highly competitive profession.

**Writing(s) at the Crossroads** Georgeta Cislaru, 2015-08-05. This volume aims at contributing to an interpretive approach to writing and its dynamics. It offers a general scope on the process-product interface by multiplying the points of view on both the process and the product and their links. The book presents new findings and perspectives in the study of language and writing, both theoretical and methodological, e.g. dual process models of writing, pragmatics of writing, linguistic analysis of psycholinguistic units such as bursts of production. It also presents new tools for a longitudinal approach to the writing steps, key stroke logging with integrated linguistic modules and textometric analysis of written texts. The volume is composed of five sections that highlight different approaches to writing from the viewpoint of multiple disciplines: Anthropology, Cognitive Psycholinguistics, Communication Studies, Didactics, Applied Linguistics, Discourse Analysis, Literacy, Sociolinguistics and Text Genetics. This book will be relevant for scholars and students interested in writing, text analysis, literacy, learning and teaching. As of January 2019, this e-book is freely available thanks to the support of libraries working with Knowledge Unlatched. *Detector Research And Development For The Superconducting Super Collider - Proceedings Of The Symposium* Valerie Kelly, Tom Dombeck, George P Yost, 1991-05-29. Over the last three years a significant program of detector technology research and development for high luminosity high energy hadron hadron colliders has been underway in the United States, Japan and Europe. In as much as the first formal steps have been undertaken to initiate the experimental program at the Superconducting Super Collider SSC, it is appropriate to assess in detail the status of this R Particle Tracking and Identification Techniques, Vertex Detection, Magnets, Front End Electronics, Data Acquisition Electronics, Techniques in Triggering, Data Transmission, Data Analysis and Simulation, Software Studies on Radiation Damage to Materials and
