**100 Math Brainteasers (Grade 7, 8, 9, 10)** Zbigniew Romanowicz, Bartholomew Dyda, 2014-01-23 100 Math Brainteasers Grade 7-10 is a subtle selection of one hundred arithmetic, algebra and geometry assignments which efficiently train the mind in math skills. It will be helpful for students attending High School and also in preparation for Mathematical competitions or Olympiads at a younger age. The assignments can equally be used in the classroom or in extracurricular activities. The fun and games are delightful, original and solving them is even more enjoyable thanks to the funny illustrations. Most of the math problems do not require any exceptional mathematical proficiency but above all they challenge one's creativity and ability to think logically. Only a few solicit the knowledge of algebraic expressions and rules of geometry.

**Math Puzzles Volume 2** Presh Talwalkar, 2015-10-08 What is a better fit: a square peg in a round hole or a round peg in a square hole? Your music player seems to be playing the same songs over again. Is there something wrong with the shuffle feature, or might the songs be playing randomly? You have 100 dimes and I have 99 pennies. At the same time we will toss our coins in the air and let them fall on the floor. Then we meticulously count the outcomes of our tosses. You win if you show more heads than I do. What's the probability that you will win? The YouTube channel and blog Mind Your Decisions has blog posts and original videos about math that have been viewed millions of times. The problems in this book are based on some of the best puzzles in counting, geometry and probability and game theory.
