

Conservation of Energy & Kinetic Energy

It has been shown by many experiments that energy is a quantity which, when transferred, remains constant, and can be converted from one form to another.

Work & Energy

1. Energy does not have the dimension of mass (it is the ratio of J to N), it is a scalar quantity.
2.  The ball's initial energy is 10 J when it is at the top of the ramp, and 5 J when it is at the bottom of the ramp.
3.  It is possible to transfer energy between objects without changing their total energy.
4.  All the energy transfer will go on until the ball's final energy is 0 J , when the ball comes to rest.
