## **Geotechnical Engineering Lab Manual Doc:**

*Geotechnical Engineering* William A. Kitch, 2011-08-08      **Soil Mechanics Laboratory Manual** Braja M. Das, 1986

Now in its sixth edition *Soil Mechanics Laboratory Manual* is designed for the junior level soil mechanics geotechnical engineering laboratory course in civil engineering programs. It includes eighteen laboratory procedures that cover the essential properties of soils and their behavior under stress and strain as well as explanations, procedures, sample calculations, and completed and blank data sheets. Written by Braja M. Das, a respected author of market leading texts in geotechnical and foundation engineering, this unique manual provides a detailed discussion of standard soil classification systems used by engineers: the AASHTO Classification System and the Unified Soil Classification System, which both conform to recent ASTM specifications. To improve ease and accessibility of use, this new edition includes not only the stand-alone version of the *Soil Mechanics Laboratory Test* software but also ready-made Microsoft Excel templates designed to perform the same calculations. With the convenience of point-and-click data entry, these interactive programs can be used to collect, organize, and evaluate data for each of the book's eighteen labs. The resulting tables can be printed with their corresponding graphs, creating easily generated reports that display and analyze data obtained from the manual's laboratory tests.

**Features:**

- Includes sample calculations and graphs relevant to each laboratory test.
- Supplies blank tables that accompany each test for laboratory use and report preparation.
- Contains a complete chapter on soil classification (Chapter 9).
- Provides references and three useful appendices:
  - Appendix A: Weight-Volume Relationships
  - Appendix B: Data Sheets for Laboratory Experiments
  - Appendix C: Data Sheets for Preparation of Laboratory Reports

Further, this manual covers data collection, analysis, computations, additional considerations, sources of error, precautionary measures, and the presentation of results, along with well-defined illustrations for each of the listed tests. Each test is based on relevant standards with pertinent references, broadly aimed at geotechnical design applications.

**FEATURES:** Provides fundamental coverage of elementary level laboratory characterization of soils. Describes objectives, basic concepts, general understanding, and appreciation of the geotechnical principles for determination of physical index and engineering properties of soil materials. Presents the step-by-step procedures for various tests based on relevant standards. Interprets soil analytical data and illustrates empirical relationships between various soil properties. Includes observation data sheet and analysis results and discussions and applications of test results. This manual is aimed at undergraduates, senior undergraduates, and researchers in geotechnical and civil engineering.
