Education in a Federal UK John Furlong,Ingrid Lunt,2019-10-23 Britain s two recent referenda on Brexit 2016 and on Scottish independence 2014 have raised in the public mind fundamental questions about the future of the UK It seems that for the first time the public the media and the political elite have woken up to the fact that in different parts of the UK there are different histories different aspirations and different imagined futures in relation to a whole range of vitally important political issues But what the public debate often fails to recognise is that in many areas of public life perhaps especially education the UK is already a federal state and in key respects has been so for many years The aim of this volume is therefore to take stock to try and capture what the current state of educational policy and practice is across the whole of the UK This has been achieved by commissioning two different papers from each of the four countries Wales Scotland Northern Ireland and England The first is an overview exploring the distinctive history principles and current policies of each country The second paper has been specifically chosen as a case study of a key policy that highlights the

distinctiveness of each country the Foundation Phase for Wales assessment policy in Scotland shared education initiatives in Northern Ireland and higher education policy in England Taken together these eight papers give an important insight into the complexities of educational policy and practice across the whole of the UK today This volume was originally published as a special issue of Oxford Review of Education *Becoming a Teacher: Issues in Secondary Education 6e* Simon Gibbons,Melissa Glackin,Elizabeth Rushton,Emma Towers,Richard Brock,2023-03-27 Essential reading for anyone learning to be a teacher This book will continue to be a core text on our ITE programmes Rachele Newman Director of Initial Teacher Education University of Southampton UK A comprehensive must have for every new teacher entering the profession a wide variety of short chapters packed full of key research evidenced ideas brilliantly articulated by a team of expert authors Fantastic Mark Winterbottom Professor of Education University of Cambridge UK The beauty of the book is that the authors do not attempt to simplify teaching instead they celebrate and explore the complexities of being a teacher Stefanie Sullivan Deputy Head of School Director of Initial Teacher Education University of Nottingham UK This timely new edition remains the ultimate guide for students in the core areas of teaching policy assessment and curriculum planning while also covering the relevant issues facing educators and students today Grounded in contemporary research and empirical evidence *Becoming a Teacher* provides a critical yet accessible exploration of the complexities involved in starting a career in secondary education New chapters include topics such as wellbeing and mental health social justice decolonising the curricula and how to develop teacher identity when starting a career Themes such as digital pedagogy now run through the core of the book reflecting the future of our education system The book Supports students with a blend of theory and practical solutions Integrates a wide range of issues contexts and perspectives Guides and encourages readers to reflect on their own learning and teaching Covers practical classroom implementations theoretical and empirical research social and cultural dimensions and much more Benefitting from the expertise of top academics in the education field while leaving room for the reader to engage with their own critical reflection this book is essential for PGCE and Education students to gain a thorough understanding of the many facets of education as well as their own role as a teacher Simon Gibbons is Senior Lecturer in English Education and Director of Teacher Education at King s College London UK He is a former chair of the National Association for the Teaching of English Richard Brock is a Lecturer in Science Education at King s College London UK He taught secondary physics for many years in greater London and has also taught English in Japan and worked in special education Melissa Glackin is Senior Lecturer in Science Education and the Director of the MA in STEM Education at King s College London UK Elizabeth Rushton is Head of Department of Curriculum Pedagogy and Assessment at the Institute of Education University College London UK She previously led the Geography PGCE at King s College London after having worked as a geography teacher and as Director of Evaluation for an education charity Emma Towers is a Teaching Fellow in Education Policy at King s College London UK Before moving into higher education she worked as a primary school teacher

in London schools *Education Policy, Practice and the Professional* Jane Bates,Sue Lewis,Andy Pickard,2019-03-21 In this introduction to educational policy practice and professionalism the authors focus first on providing an historical overview of English policy from the state's first interventions in education through to Thatcherism and the election of the Blair government Chapters then explore the key contemporary policies of recent times and offer a critique on how they have worked in practice with reference to the hysteria that often surrounds education policy An important theme is media representation of educational matters and the effects this has on the teaching profession Commentaries and case studies are presented throughout providing an accessible link to what it was really like to learn teach and live at the time the policy was in place This new edition now includes an account of the measures taken by the Coalition Government of 2010-15 examining the Coalition's continuities with the previous administration whilst also exploring departures from previous thinking and practices updated references and case studies throughout to represent new research and legislation since the first edition an extended discussion of globalization and global policy borrowing further coverage of social justice theory including a perspective on identity theory and the role of education in the development of identity and the marginalisation of individuals and groups a new historical chapter covering the period 1945 to 1997 a summary of the development of the curriculum and a critique of the 2014 National curriculum as pioneered by Michael Gove and a new conclusion setting out the trajectory of current policies and how this may affect educational practitioners This is essential reading for all undergraduate students studying education policy and practice
