Capacity Building for Sustainable Development Valentine Udoh James, 2018-04-02 This book presents over 40 cases of bamboo development across 22 major bamboo industry countries and explores the knowledge gained from their successes and failures. It synthesises experiences and exchanges with country experts from international training courses and consultations, study tours and seminars. Each case includes observations and summaries of discussions related to the development of bamboo based industries in a healthy sustainable way and the facilitation of strategic and balanced development of bamboo in different global regions. Industrial and artisanal bamboo growing and processing is expanding worldwide and this book brings together key experiences to help inform future developments. This book provides an analysis of bamboo plant features including strong renewability, fast growing and high biomass production. It also reviews important ecological functions of bamboos such as water and soil conservation, carbon sink and storage and adaptation to climate change as well as addressing the diversified culture of bamboo and key issues affecting the sector. Highly illustrated and in full colour throughout, this book is an essential resource for all those interested in bamboo, from private sector investors to governmental and development agencies, academic researchers and students.
