Evidence, Respect and Truth Liat Levanon,2022-11-03 Can we rely solely on statistics when we judge what is true and just This book takes a holistic approach to addressing this question It considers the legal trial as its paradigmatic case study before analysing a wide range of different cases including profiling the use of algorithms to predict students grades and the authorisation of automated cars The book suggests that when we make judgements about the truth or about justice approximations are not good enough Truth and justice are uncompromising They must be so because the value that underlies them both is respect and respect takes no compromise Thus in the search for truth as in the search for justice a body of evidence that imposes a statistical compromise will not do Only evidence that in principle allows reaching the truth and doing justice is good evidence Once such evidence has been traced the burden is on us to make good use of the evidence and reach truth and justice We might or might not succeed but once we have done our best on evidence that allows success our judgements are justified and as such they can resolve conflicts over the truth and over justice *Criminal Justice 1999-2000* Joseph L.
