*Improving Quality in American Higher Education* Richard Arum, Josipa Roksa, Amanda Cook, 2016-05-02 An ambitious comprehensive reimagining of 21st century higher education *Improving Quality in American Higher Education* outlines the fundamental concepts and competencies society demands from today's college graduates and provides a vision of the future for students, faculty, and administrators. Based on a national multidisciplinary effort to define and measure learning outcomes, the Measuring College Learning project, this book identifies essential concepts and competencies for six disciplines. These essential concepts and competencies represent efforts towards articulating a consensus among faculty in biology, business, communication, economics, history, and sociology disciplines that account for nearly 40 percent of undergraduate majors in the United States. Contributions from thought leaders in higher education, including Ira Katznelson, George Kuh, and Carol Geary Schneider, offer expert perspectives and persuasive arguments for the need for greater clarity, intentionality, and quality in U.S. higher education. College faculty are our best resource for improving the quality of undergraduate education. This book offers a path forward based on faculty perspectives nationwide. Clarify program structure and aims. Articulate high-quality learning goals. Rigorously measure student progress. Prioritize higher-order competencies and disciplinarily grounded conceptual understandings. A culmination of over two years of efforts by faculty and association leaders from six disciplines, this book distills the national conversation into a delineated set of fundamental ideas and practices and advocates for the development and use of rigorous assessment tools that are valued by faculty, students, and society. *Improving Quality in American Higher Education* brings faculty voices to the fore of the conversation and offers an insightful look at the state of higher education and a realistic strategy for better serving our students.

*Academic Quality Work* William F. Massy, Steven W. Graham, Paula Myrick Short, 2007-05-11 The proposal for improving academic quality without spending more or abandoning other priorities presented in 2003 in William Massy's *Honoring the Trust* is extended and applied in this how-to book. Informed by successful applications of academic audit at the department level by the University of Missouri System and the Tennessee Board of Regents, this book offers tested descriptions of academic quality work and the audit process. It extends both to include research and teaching at community colleges and four-year campuses. The authors see audit as a way to jump start and then reinforce a self-sustaining cycle of academic quality improvement. This approach, which is low cost and highly collegial, uses structured conversation within the

department and between department members and auditors to examine the possibilities for improvement and achieve commitments for change Academic Quality Work is aimed at change agents provosts deans department chairs academic senate members and faculty and sponsors of quality improvement such as trustees foundation leaders and legislatures This book provides 1 the conceptual tools needed to apply audit in any academic setting 2 materials for orientation and training 3 examples of self study and audit reports and 4 testimonials from faculty Sociology, Advanced Test James Warner Morrison,1979 **High Performing Colleges: Case and practice** Daniel Seymour,1996 **The ETS Test Collection Catalog** Educational Testing Service,1987-12 **IU Newspaper** ,1990 *The Undergraduate Program for Counseling and Evaluation* Educational Testing Service,1969 Assessing College Data United States.
