Hobby Lobby Math Test:

Hanging in the Balance Meghan Campbell, 2025-10-30 This book gives the first in depth assessment of how justification functions when women are claiming their right to equality How can courts assess whether a proposed limit to women s equality is constitutionally justified This question is rarely explicitly asked with the assumption that well established limitation frameworks such as proportionality are able to assess whether limits to women s rights are justified However delving into the theory and practice of justification reveals fracture points between the dominant approach to justification and women s rights to equality One of its distinctive characteristics is the question of whether any analytical entwining or unwinding of equality and justification enhances the protection of women s rights to equality in constitutional democracies It proposes a novel asymmetric relationship between equality and justification that requires innovative methodological approaches that enrich the task of adjudicating limits to women s equality This is an intriguing articulate and compelling examination of a question with real and applied significance to all those working on human rights and equality
