Hitachi 42 User Guide:

AI System Support for Conceptual Design John E.E. Sharpe, 2012-12-06 It is well known that some 85% of the resources necessary to design and bring to market a product are committed by decisions taken in the first 10% of the design activity. This together with the wish to reduce further the time to market of high quality innovative products has increased the need for computer support at the conceptual design stage of the engineering design process life style. This proceedings firmly focuses on the continuing research into new uses of Artificial Intelligence AI during the conceptual design process. It shows how novel applications of AI may be integrated with aspects of solid modelling simulation optimisation and multiple criterion decision making. A particular emphasis is placed on the use of AI methods in the overall design of products from major Civil Engineering structures to Consumer Electronics.

ASHRAE Handbook, 1996 *Sound & Vision*, 2006 *System-Level Synthesis* Ahmed Amine Jerraya, Jean Mermet, 2012-12-06 System Level Synthesis deals with the concurrent design of electronic applications including both hardware and software. The issue has become the bottleneck in the design of electronic systems including both hardware and software in several major industrial fields including telecommunications automotive and aerospace engineering. The major difficulty with the subject is that it demands contributions from several research fields including system specification system architecture hardware design and software design. Most existing book cover well only a few aspects of system level synthesis. The present volume presents a comprehensive discussion of all the aspects of system level synthesis. Each topic is covered by a contribution written by an international authority on the subject.
