administrators and superintendents The Inland Printer ,1902 **Burning Money** C. Fred Blake,2011-09-30 For a thousand years across the length and breadth of China and beyond people have burned paper replicas of valuable things most often money for the spirits of deceased family members ancestors and myriads of demons and divinities Although frequently denigrated as wasteful and vulgar and at times prohibited by governing elites today this venerable custom is as popular as ever Burning Money explores the cultural logic of this common practice while addressing larger anthropological questions concerning the nature of value The heart of the work integrates Chinese and Western thought and analytics to develop a theoretical framework that the author calls a materialist aesthetics This includes consideration of how the burning of paper money meshes with other customs in China and around the world The work examines the custom in contemporary

everyday life its origins in folklore and history as well as its role in common rituals in the social formations of dynastic and modern times and as a sacrifice in the act of consecrating the paper money before burning it Here the author suggests a great divide between the modern means of cultural reproduction through ideology and reification with its emphasis on nature and realism and previous pre capitalist means through ritual and mystification with its emphasis on authenticity The final chapters consider how the burning money custom has survived its encounter with the modern global system and internet technology Innovative and original in its interpretation of a common ritual in Chinese popular religion Burning Money will be welcomed by scholars and students of Chinese religion as well as comparative religion specialists and anthropologists interested in contemporary social theory *The Economist* ,1993 *The American Stationer* ,1907 *The Dream Doers and the Summer of Secrets* Bonnie Schaefer,2008-05-13 In the Summer of Secrets twelve year old Tyler Davis is determined to pitch for his all star team But he has never thrown a strike in his Little League career And eleven year old Alexandria Wilkins is determined to play in a local tennis tournament But she doesn t have a coach to teach her how to play So the best friends decide to be Dream Doers and work together to achieve their goals Along the way they encounter Hector Magruder the hermit who lives in the woods From him they learn about a silent enemy that is far more dangerous than the neighborhood bully Zachary Graham What they don t know is that the more time they spend with Hector and the closer they come to discovering his secrets the more danger they create for themselves and their families **The Washington Post**

**Pulitzers: Phil Kennicott, Criticism** Phil Kennicott,The Washington Post,2014-08-26 Recipient of the Pulitzer Prize for Criticism For critic Philip Kennicott the line between art and social criticism is a thin one In a voice both knowledgeable and compassionate Kennicott joins his readers in contemplating the much deeper meaning underlying aesthetics From his examination of violence and war in his review of a Taryn Simon photographic project to his analysis of corporate America in an exhibit for architect Kevin Roche Kennicott not only interprets art but captures and conveys its meaning and significance in a manner that invites readers in and encourages us to look closer *A Prehistory of the Cloud* Tung-Hui Hu,2016-09-02 The militarized legacy of the digital cloud how the cloud grew out of older network technologies and politics We may imagine the digital cloud as placeless mute ethereal and unmediated Yet the reality of the cloud is embodied in thousands of massive data centers any one of which can use as much electricity as a midsized town Even all these data centers are only one small part of the cloud Behind that cloud shaped icon on our screens is a whole universe of technologies and cultural norms all working to keep us from noticing their existence In this book Tung Hui Hu examines the gap between the real and the virtual in our understanding of the cloud Hu shows that the cloud grew out of such older networks as railroad tracks sewer lines and television circuits He describes key moments in the prehistory of the cloud from the game Spacewar as exemplar of time sharing computers to Cold War bunkers that were later reused as data centers Countering the popular perception of a new cloudlike political power that is dispersed and immaterial Hu argues that the cloud grafts digital technologies onto older

ways of exerting power over a population But because we invest the cloud with cultural fantasies about security and participation we fail to recognize its militarized origins and ideology Moving between the materiality of the technology itself and its cultural rhetoric Hu's account offers a set of new tools for rethinking the contemporary digital environment
