**Future-Ready Teaching With AI** Aaron Blackwelder, Jason Cowley, 2024-12-21 Prepare your students for a future where AI literacy is crucial. Artificial intelligence AI is here and seems on the brink of transforming education. As teachers we know that AI will not diminish the need for students to learn essential skills. It will however change how we teach and will require us to develop new skill sets for instruction and assessment. Teachers have a new opportunity to embrace future ready instruction that prepares students to engage in a world that expects them to be AI literate. In *Future Ready Teaching With AI* *Unlocking Student Potential in the Age of Artificial Intelligence* authors Aaron Blackwelder and Jason Cowley explore the integration of AI in the classroom and its potential to revolutionize teaching. Much more than simply a book about using AI tools this rich resource aims to help teachers raise rigor, increase engagement and promote more meaningful learning opportunities in their classrooms as they embrace the future of teaching and learning. Offering evergreen principles and strategies to help educators navigate the age of AI this book encourages critical thinking about the ethical use of AI to foster conversations with students. Highlights various practical tools that can help teachers meet diverse student learning needs as well as create AI proof assignments. Includes chapter vignettes, sample AI prompts, activities, reflective questions and links to online resources to support teachers work in the classroom. Examines how to leverage AI to streamline rudimentary tasks such as lesson planning, assessment and differentiation, allowing teachers to focus on building relationships, providing feedback and personalizing learning for their students. Written by two secondary teachers this book is an essential resource for K-12 teachers and administrators looking to move beyond the basics of using AI. By equipping educators to become leaders in this transformation, *Future Ready Teaching With AI* demonstrates how to harness the power of AI to help every student thrive.

Pertinently the Gates Foundation's recently completed effort to improve student outcomes through enhancing the teacher evaluation process failed to achieve substantive improvement. The way observations are currently designed serve as an obstacle to teacher risk taking. Teachers fear negative evaluations when their pedagogy is rated and they lack faith in being supported by supervisors because a trusting relationship between them and their observer has not been built. Trust Based Observations Maximizing Teaching and Learning Growth is a schema changing evaluation model that understands people perform at their best when they feel safe and supported. It begins with twelve 20 minute observations per week followed by collegial conversations driven by reflective questions sharing observed teaching strengths and the building of safe and trusting relationships with teachers. Add the elimination of rating pedagogical skills and replace it with rating mindset and teachers trust. When teachers fully embrace risk taking and innovation it leads to remarkable
