Holt Environmental Science Answer Feeding The World:

Can We Feed the World Without Destroying It? Eric Holt-Gimenez, 2019-02-25 Nearly a third of the world's population suffers from hunger or malnutrition. Feeding them and the projected population of 10 billion people by 2050 has become a high profile challenge for states, philanthropists and even the Fortune 500. This has unleashed a steady march of initiatives to double food production within a generation. But will doing so tax the resources of our planet beyond its capacity? In this sobering essay, scholar/practitioner Eric Holt-Gimenez argues that the ecological impact of doubling food production would be socially and environmentally catastrophic and would not feed the poor. We have the technology, resources and expertise to feed everyone. What is needed is a thorough transformation of the global food regime, one that increases equity while producing food and reversing agriculture's environmental impacts. *Think Sociology* John Carl, Sarah Baker, Brady Robards, John Scott, Wendy Hillman, Geoffrey Lawrence, 2011-08-16 *THINK Currency* *THINK Issues* *THINK Relevancy* *THINK Sociology* With an engaging visual design and just 15 chapters, *THINK Sociology* is the Australian Sociology text your students will want to read.
