child apart from the family the authors recognise that child safeguarding affects the lives not just of children but also of parents grandparents and communities Working Ethically in Child Protection eschews dominant rational technical models for relational ones that are value centred and focus on family well being as a whole Rather than a single focus on assessing risk and diagnosing deficit this book recognises that our child protection systems bear down disproportionately on those from disadvantaged and marginalised communities and argues that what is needed is real support and practical assistance for poor and vulnerable parents and children It uses real world case examples to illustrate the relevant ethical and practice principles and ways in which students and practitioners can practise ethically when dealing with complex multi faceted issues
