CIRCULAR MOTION Dr. Sanjay Kumar,2020-10-13 This text book is primarily intended for students who are preparing for the entrance tests of IIT JEE NEET AIIMS and other esteemed colleges in same fields This text is equally useful to the students preparing for their school exams Our main goals in writing this text book are to present the basic concepts and principles of physics that students need to know for their competitive exams 1 to provide a balance of quantitative reasoning and conceptual understanding with special attention to concepts that have been causing difficulties to student in understanding the concepts 2 to develop students problem solving skills and confidence in a systematic manner 3 to motivate students by integrating real world examples that build upon their everyday experiences Main Features of the Book 1 Every concept is up to the mark and it is given in student friendly language with various solved problems The solution is provided with problem solving approach and discussion 2 Checkpoint questions have been added to applicable sections of the text to allow students to pause and test their understanding of the concept explored within the current section The answers and solutions to the Checkpoints are given in answer keys at the end of the chapter so that students can confirm their knowledge

without jumping too quickly to the provided answer 3 Special attention is given to all tricky topics like centripetal and tangential acceleration uniform circular motion vs projectile motion relative angular velocity centripetal and centrifugal force unbanked and banked curves motion in a vertical circle Coriolis force optional effect of rotation of earth on apparent weight and the physics of artificial gravity so that student can easily solve them with fun 4 To test the understanding level of students multiple choice questions conceptual questions practice problems with previous years JEE Main and Advanced problems are provided at the end of the whole discussion Number of dots indicates level of problem difficulty

Straightforward problems basic level are indicated by single dot intermediate problems JEE mains and NEET level are indicated by double dots whereas challenging problems advanced level are indicated by thee dots Answer keys with hints and solutions are provided at the end of the chapter

Unit 20 Open University. MST209 Course Team,OU Course

Team,2005-01 The theme of this unit is rotational motion It concentrates mainly on analysing the circular motion of a particle This can be used to model a wide range of situations such as a child on a swing the pendulum of a clock and a chair o plane roundabout at a fairground In Section 1 we derive the velocity and acceleration of a particle moving in a circle In Section 2 we apply Newton s second law to uniform circular motion i e motion in a circle with constant speed In Section 3 this is extended to non uniform circular motion Section 4 starts to look beyond circular motion to the concepts that are needed to analyse more general rotational motion
