**Mountain Biking, Culture and Society** Jim

Cherrington, 2024-02-15 This book represents the first critical examination of the social, cultural, and political significance of mountain biking in contemporary societies. Starting from the premise that cultures of mountain biking are diverse, complex, and at times contradictory, this book offers practical and theoretical insights into a range of embodied material and socio-technical relationships. Featuring contributions from an interdisciplinary team of researchers, artists, and Indigenous community members with backgrounds in sociology, anthropology, cultural studies, community development, and coaching, chapters critically unpack the complex and contested nature of mountain biking identities, bodies, environments, and inequalities within specific settings. Via a range of international case studies from England, Scotland, America, Canada, New Zealand, and South Africa, authors highlight how tensions and conflicts in the world of mountain biking initiate important conversations about climate change, colonialism, discrimination, and land use. This is essential reading for academics and practitioners in sociology, cultural studies, sport for development, and human geography.
