## **Inducing Genetic Change In Cancer Cells Using Lasers:**

**Inducing Genetic Change in Cancer Cells Using Lasers** Muhammad Waleed,2014-12-04 In this book we demonstrate a new single cell optoporation and transfection technique using femtosecond Gaussian laser beam and optical tweezers Tightly focused near infrared NIR femtosecond laser pulse was employed to transiently perforate the cellular membrane at a single point of MCF 7 cancer cell A distinct technique is developed by trapping the microparticle using optical tweezers to focus femtosecond laser exactly on the cell membrane to puncture it for the desired time Subsequently calculated amount of external gene was introduced in the cell by trapping and inserting same plasmid coated microparticle into optoporated cell using optical tweezers Various experimental parameters such as femtosecond laser exposure power exposure time punctured hole size exact focusing of femtosecond laser and cell healing time were closely analyzed to optimize the best conditions for cell viability Trapped particle position is detected by another co aligned continuous wave laser In the end after insertion of plasmid coated microparticle the targeted cells exhibited green fluorescent protein GFP under the fluorescent microscope hence confirming successful genetic change

**Manipulation of Cells and Tissues** Michael W. Berns,Karl Otto Greulich,2007-06-20 The use of laser based manipulation tools has literally exploded on the cell biology and molecular pathology scene resulting in as many different laser

micromanipulation systems as there are people using them Laser Manipulation of Cells and Tissues ties all these systems and studies together describing all of the different kinds of research and practical analytical applications of laser manipulation It also provides the reader with the basic information needed to actually build one s own laser micro manipulation system The combination of imaging and molecular probe technology with laser micromanipulation greatly extends the use of this technology in molecular cellular developmental and patho biology medicine This book should be valuable to scientists

clinicians and students in the fields of cell and developmental biology cell physiology cancer biology pathology and stem cell biology Devotes four chapters to laser catapulting and capture of DNA and other cellular material for biochemical analysis a major use of this technology that has been adapted for molecular pathology both in clinical medicine and research Discusses the theory of laser tweezers optical tweezers and its application to novel problems in biology Covers topics on optoporation getting things into cells uncaging of molecules and the ability to collect and analyze nanomolar amounts of cell material by

**Journal** ,1980 **Chemical Abstracts** ,2002 Textbook of Bone Metastases Claude Jasmin,2005-03-11 The epidemiological and clinical importance of bone metastases has long been recognised For example the incidence of bone metastases in breast and prostate cancers is 70% whereas it is only 30 to 40% in metastatic lung cancer In clinical terms bone metastases have substantial negative effects on the patient's quality of life Bone metastases have generally received insufficient attention because of the difficulty in quantifying them which has left them outside the scope of therapeutic trials The justification for a textbook on the subject of bone metastases is the quite remarkable progress made recently in the understanding of the molecular and cellular mechanisms involved in osteogenesis and osteolysis and their development for therapeutic purposes The treatment of malignant hypercalcaemia has also been revolutionised by the use of bisphosphonates The Textbook of Bone Metastases presents a broad approach to recent progress in all fields related to bone metastases ranging from epidemiology to the pathophysiology of bone metastases and therapeutics This book provides a better understanding of recent advances and more importantly will give clinicians all the information needed to help them in the clinical and therapeutic management of patients with bone metastases
