

Listed below are five amino acids. Use the genetic code to determine the exact codon for each amino acid. A point mutation at the genetic level in each codon results in the change indicated. For each mutation, indicate whether it is due to a transition or a transversion, and then indicate the effect of each mutation at the protein (amino acid level) (i.e., silent, nonsense, missense). In addition, Please note, each of the three lines above an amino acid represents a **single** RNA base. For example, when you look at the codon chart AUG would stand for Met (methionine). You can also refer to the HINT document posted in the module.

Mutation 1:

1. Circle the appropriate answer: This mutation is a transition/transversion
2. Circle the appropriate answer: This mutation results in a missense/silent/nonsense mutation in the protein sequence.

Mutation 2:

1. Circle the appropriate answer: This mutation is a transition/transversion
2. Circle the appropriate answer: This mutation results in a missense/silent/nonsense mutation in the protein sequence.

Mutation 3:

1. Circle the appropriate answer: This mutation is a transition/transversion
2. Circle the appropriate answer: This mutation results in a missense/silent/nonsense mutation in the protein sequence.

Laboratory Manual of Biological Chemistry Otto Folin, 1925 **Laboratory Manual of Biochemistry** Dr. Prashant D. Aragade, Dr. N. B. Ghiware, Mr. Sushant Sudhir Pande, Dr. Seemadevi Suresh Kadam, 2024-02-16 We are pleased to put forth the Laboratory Manual of Biochemistry. This manual prepared according to the PCI B Pharm course regulations 2014 is divided into four sections: qualitative analysis, quantitative analysis, estimation of blood parameters, and catalytic role of enzymes. The methods of all the experiments are drawn from the latest editions of official books such as the Indian Pharmacopoeia and research papers, ensuring the inclusion of the latest advancements in methodologies or apparatus. This manual is designed for outcome-based education. Each experiment follows a uniform format with sections for practical significance, practical outcomes, PrOs, mapping with course outcomes, theory, resources used, procedure, precautions, observations, results, conclusion, references, and synopsis questions. Each experiment offers an opportunity for students to perform practical work, developing proficiency in effectively managing equipment, handling glassware, chemicals, reagents, and writing analytical reports. In addition, the questions at the end of the experiments help to enhance students' knowledge, benefiting them as they pursue higher studies. During the laboratory period, you will need to juggle multiple tasks while performing the experiment. It is essential to document your actions and observations thoroughly as you proceed. Always plan your work ahead, considering what you are doing, why you are doing it, what is happening, and what conclusions you can draw from your experiment. We acknowledge the help and cooperation of various individuals in bringing out this manual. We are highly indebted to the authors of the books and articles mentioned in the references, which were a major source of information for this manual. We also thank the publishers, designers, and printers who worked hard to publish this manual in a timely manner. We hope that this manual will be helpful to students in understanding concepts, principles, and performing procedures. We wish you all the best.
