Behind the notebook, a stack of three books is visible. The top book has a dark blue cover with the white text "TOP SELF-PUBLISHERS". To the left of the stack, the spines of two other books are visible: one with a green cover and another with a light beige cover. The background is a plain, light blue wall. In the top right corner, a small, light-colored ceramic pot with a green succulent sits on a wooden surface.

shape and form but the very fabric of spacetime. This book presents the idea that virtual reality represents a pivotal moment in art history the next profound evolution in the long lineage of fine art painting. It argues that VR liberates the medium of painting from its physical constraints creating a virtual painting reality spacetime where artists can paint in a true fourth dimension making time itself as malleable as pigment. This work forges a new critical framework to navigate this uncharted territory bridging the visceral tradition of paint with the ethereal potential of virtual space. Drawing on the philosophies of Gilles Deleuze and the pioneering practices of artists like Char Davies and Fabian Marcaccio the book explores the dissolution of boundaries between media arts and fine arts artwork and observer the physical and the virtual. The core is an investigation into how immersive presence temporal fluidity and interactive emergence give rise to novel aesthetics and experiences fundamentally transforming our understanding of what a painting can be. Positioning virtual reality painting not as a departure from tradition but as the fulfilment of painting's historical quest to push beyond its inherited limitations this book is an invitation to step through the frame. It is a journey into a world where the canvas becomes a living reality and the painter's gesture can echo into the fourth dimension.

Why It's OK to Be Amoral Ronald de Sousa,2024-11-29 Why It's OK to Be Amoral argues that self righteous moralism has replaced religion as a source of embattled and gratuitous certainties High minded moral convictions invoke the authority of sacred moral truths but there are no such truths In reality moral passions are rooted in atavistic emotional dispositions and arbitrary social conventions While public and private discourse is saturated with guilt shame and righteous indignation professional philosophers under cover of clever argumentation promote the utopian idea that all practical questions have uniquely right answers providing that you adopt the right moral principles But their justifications for those principles appeal to contested foundations among which no rational adjudication is possible Moreover because there are two discrepant ways of understanding motivation our access to agents true reasons is never sufficiently reliable to warrant moral praise or blame Finally every agent has a wide diversity of reasons for action yet moralists claim that some reasons trump all others because they are moral reasons Since these too must be grounded in facts that amounts to double counting some reasons Having exposed these aspects of the institution of morality this book suggests that if we cannot abstain altogether from moralising we can at least try to use it against itself Key Features Describes and criticises seven approaches to the question Why should I do or not do X Develops an original objection to the idea of identifying a domain of moral reasons namely that it amounts to the unwarranted double counting of a subset of our reasons Describes two ways of thinking about reasons and choices and explains how the discrepancy between them makes it impossible to assess an agent's motivation reliably enough to warrant moral praise or blame Outlines the subtle changes in attitude involved in espousing amorality without giving up on rational choices and honest political commitments
