**Reflections on Europe** Hans-Åke Persson, Bo Stråth, 2007

When Dutch and subsequently French voters rejected the Draft Treaty for a Constitution for Europe in Spring 2005 many voices called for a pause for reflection This book is in part a result of that moment of reflection We wanted to contribute to the debate about Europe but crucially we sought to do so by taking a step back from the problem formation and agenda setting of Brussels For the authors of this volume one key to establishing critical distance has been the reappraisal of the historical perspective Another has been the problematisation of Europe as a space as opposed to looking for a definition of borders The authors also seek critical distance through a focus on the tension between Europe as a culture as a polity and as an economy These tensions have often been neglected or even ignored and the relationships have been seen as more or less synonymous and harmonious The aim of this volume then is two fold It wants developing a critical distance to the present Europe to contribute to the vivid academic research and debate on Europe which too often either develops distance without commenting on the present state of affairs or comments on the present without critical distance

*The \$50 Billion Leak: Stopping Energy Waste Through Intelligent Building Systems* Charles Nehme, Welcome to the hidden crisis costing our global economy billions of dollars every single year the silent insidious drain of energy waste from the built environment For decades we have designed constructed and operated buildings that function like sieves hemorrhaging power through outdated mechanical systems uncontrolled air flows and analog management practices We treat buildings as static consumers relying on opaque monthly utility bills that offer no real insight into where when or why energy is truly being wasted This is the 50 Billion Leak and it persists because until now the technology required to plug it has been fragmented proprietary and complex This book is a direct response to that challenge Drawing on over 30 years of global experience in high performance MEP consulting my goal is to provide a comprehensive actionable roadmap for transitioning from an energy wasting legacy facility to a high performing intelligent asset We will bridge the gap between the mechanical engineer

s equations and the facility owner's bottom line We will move past superficial efficiency measures to harness the true power of Intelligent Building Systems IBS IoT connectivity and Artificial Intelligence AI These technologies are not merely costly upgrades they are the essential tools that transform energy data into economic value environmental responsibility and superior occupant comfort It is time to stop flying blind It is time to make the invisible visible It is time to plug the leak and secure a sustainable profitable future for the buildings that define our world      **New York State History Globe**
