American Environmentalism J. Michael Martinez,2013-06-20 Protecting the natural environment and promoting sustainability have become important objectives but achieving such goals presents myriad challenges for even the most committed environmentalist American Environmentalism Philosophy History and Public Policy examines whether competing interests can be reconciled while developing consistent coherent effective public policy to regulate uses and protection of the natural environment without destroying the national economy It then reviews a range of possible solutions The book delves into key normative concepts that undergird American perspectives on nature by providing an overview of philosophical concepts found in the western intellectual tradition the presuppositions inherent in neoclassical economics and anthropocentric human centered and biocentric earth centered positions on sustainability It traces the evolution of attitudes about nature from the time of the Ancient Greeks through Europeans in the Middle Ages and the Renaissance the Enlightenment and the American Founders the nineteenth and twentieth centuries and up to the present Building on this foundation the author examines the political landscape as non governmental organizations NGOs industry leaders and government officials struggle to balance industrial development with environmental concerns Outrageous claims silly misrepresentations bogus arguments absurd contentions and overblown prophesies of impending calamities are bandied about by many parties on all sides of the debate industry spokespeople elected representatives unelected regulators concerned citizens and environmental NGOs alike In lieu of descending into this morass the author circumvents the silliness to explore the crucial issues through a more focused disciplined approach Rather than engage in acrimonious debate over minutiae as so often occurs in the context of green claims he recasts the issue in a way that provides a cohesive look at all sides This effort may be quixotic but how else to cut the Gordian knot   *eWork and eBusiness in Architecture, Engineering and Construction* Ardeshir Mahdavi,Bob Martens,Raimar Scherer,2014-08-21 In the last two decades the biannual ECPPM European Conference on Product and Process Modelling conference series has provided a unique platform for the presentation and discussion of the most recent advances with regard to the ICT Information and Communication Technology applications in the AEC FM Architecture Engineering Construction and   Masonry: Building Pathologies and Design João M. P. Q. Delgado,2021-09-16 This book presents a collection of recent research works related to blast resistant design building pathologies seismic coating bottle shaped concrete struts delayed ettringite formation and waterproofing It features eight chapters on building pathologies as well as a detailed set of references and suggestions for further reading Offering a systematic review of the current state of knowledge it is a valuable resource for scientists students practitioners and lecturers in various scientific and engineering disciplines including civil and materials engineering as well as and other interested parties   Automotive Air Conditioning Quansheng Zhang,Shengbo Eben Li,Kun Deng,2016-08-10 This book presents research advances in automotive AC systems using an interdisciplinary approach combining both thermal science

and automotive engineering It covers a variety of topics such as control strategies optimization algorithms and diagnosis schemes developed for when automotive air condition systems interact with powertrain dynamics In contrast to the rapid advances in the fields of building HVAC and automotive separately an interdisciplinary examination of both areas has long been neglected The content presented in this book not only reveals opportunities when interaction between on board HVAC and powertrain is considered but also provides new findings to achieve performance improvement using model based methodologies   The Finite Element Method: Its Basis and Fundamentals O.
