A Legacy of Learning David T. Kearns,James Harvey,2000-03 What s wrong with America s schools Why can t we fix them How did we wind up with dropout rates of 25 percent and graduates who can barely read and write Why does the United States spend twice as much on education as the international average and wind up near the bottom of the barrel in global comparisons of student achievement Why do we lag behind nations such as South Korea Hungary and Singapore And how should we go about improving the situation Answers to these questions lie at the heart of this volume David T Kearns and James Harvey contend we are fine tuning failure We have yet to break with the past in order to face a different and challenging future Despite worshipping at the altar of local control we have managed to create cookie cutter schools across the country We have been sidestepping the transparent need for common expectations about what students should know and be able to do Standards the authors say are not clear enough or high enough Above all we have met the enemy and it is us all of us support change as long as someone else is changing This book is a fascinating and provocative analysis of where we went wrong and what we need to do to get American education back on track It defines the kind of education our kids deserve It calls for a new definition of public education in which choice is taken for granted And it outlines an action agenda to help parents and citizens make first class schools truly their own In the future the authors argue we should think of a public school as any other non profit entity capable of operating in the public interest free of the red tape now strangling public education It should be paid for by the public and accountable to the public with its charter or contract routinely revoked when it stops serving public purposes or fails to meet its performance goals
