Fix scaling for apps

Some desktop apps might look blurry when your display settings change. Windows can try to fix these apps so they look better when you open them the next time. This only works for apps on your main display, and it won't work for all apps.

Let Windows try to fix apps so they're not blurry

Custom scaling

All your displays will be set to the custom scaling size you enter. This can cause some text, apps, and other items to be unreadable if a display doesn't support that size. It might be hard to go back to your original settings.

Enter a custom scaling size between 100% - 500% (not recommended)
