

"If any of you lacks wisdom, you should ask God, who gives generously to all without finding fault, and it will be given to you."  
-James 1:5

# Decision Matrix-Example

Making decisions can be challenging especially if you haven't established some guidelines for what kind of solution you need. Without clear criteria we can easily make decisions based on feelings or impulse rather than wisdom. A decision matrix is a tool for identifying the best possible solution based on your chosen criteria.

Directions: fill in the problem you're needing to solve. In each Solution Criteria slot fill in your non-negotiables or the requirements that need to be met in order to achieve your desired results. In each Solution slot, fill in your possible solutions. Then evaluate each solution against your established criteria.

Problem Where to Vacation	Solution Criteria 1 Weather: 75-85 degrees	Solution Criteria 2 Beach or Mountains	Solution Criteria 3 Good Food Options	Solution Criteria 4 \$2,500 or less	Solution Criteria 5 No more than 6 hour drive away	TOTAL
Solution 1 Traverse City, Michigan	X	X	X	X	X	5
Solution 2 Asheville, North Carolina	X	X	X			3
Solution 3 Gatlinburg, Tennessee	X	X	X	X		4
Solution 4 Lexington, Kentucky	X		X	X	X	4

## Manual Decision Matrix Example

**Stanley Y. W. Su**

## **Manual Decision Matrix Example:**

*Pipeline Risk Management Manual* W. Kent Muhlbauer, 2004-01-24 Here's the ideal tool if you're looking for a flexible straightforward analysis system for your everyday design and operations decisions. This new third edition includes sections on stations geographical information systems, absolute versus relative risks and the latest regulatory developments. From design to day to day operations and maintenance this unique volume covers every facet of pipeline risk management, arguably the most important definitely the most hotly debated aspect of pipelining today. Now expanded and updated this widely accepted standard reference guides you in managing the risks involved in pipeline operations. You'll also find ways to create a resource allocation model by linking risk with cost and customize the risk assessment technique to your specific requirements. The clear step by step instructions and more than 50 examples make it easy. This edition has been expanded to include offshore pipelines and distribution system pipelines as well as cross country liquid and gas transmission pipelines. The only comprehensive manual for pipeline risk management. Updated material on stations geographical information systems, absolute versus relative risks and the latest regulatory developments. Set the standards for global pipeline risk management.

*CDP Review Manual* Kenniston W. Lord, 1986    **Armor**, 1993    **Global Project Management Handbook:**

**Planning, Organizing and Controlling International Projects, Second Edition : Planning, Organizing, and Controlling International Projects** David Cleland, Roland Gareis, 2006-05-25 Learn and apply successful international project management techniques. Contributors from 20 nations reveal how current project management concepts and techniques can be successfully applied in different political, cultural and geographical settings. Learn how project management is carried out in major countries such as Canada, China, Russia, Germany, France, England and how these techniques can be applied globally. Case histories from around the world provide lessons on the international application of project management. 16 completely new chapters including ones on the rebuilding of Iraq, project management in outsourcing initiatives and developing multinational teams.

**Intelligent Credit Scoring** Naeem Siddiqi, 2016-12-20 A better development and implementation framework for credit risk scorecards. Intelligent Credit Scoring presents a business oriented process for the development and implementation of risk prediction scorecards. The credit scorecard is a powerful tool for measuring the risk of individual borrowers, gauging overall risk exposure and developing analytically driven risk adjusted strategies for existing customers. In the past 10 years, hundreds of banks worldwide have brought the process of developing credit scoring models in house while credit scores have become a frequent topic of conversation in many countries where bureau scores are used broadly. In the United States, the FICO and Vantage scores continue to be discussed by borrowers hoping to get a better deal from the banks. While knowledge of the statistical processes around building credit scorecards is common in the business context and intelligence that allows you to build better, more robust and ultimately more intelligent scorecards is not. As the follow up to Credit Risk Scorecards, this updated second edition includes new detailed

examples new real world stories new diagrams deeper discussion on topics including WOE curves the latest trends that expand scorecard functionality and new in depth analyses in every chapter Expanded coverage includes new chapters on defining infrastructure for in house credit scoring validation governance and Big Data Black box scorecard development by isolated teams has resulted in statistically valid but operationally unacceptable models at times This book shows you how various personas in a financial institution can work together to create more intelligent scorecards to avoid disasters and facilitate better decision making Key items discussed include Following a clear step by step framework for development implementation and beyond Lots of real life tips and hints on how to detect and fix data issues How to realise bigger ROI from credit scoring using internal resources Explore new trends and advances to get more out of the scorecard Credit scoring is now a very common tool used by banks Telcos and others around the world for loan origination decisioning credit limit management collections management cross selling and many other decisions Intelligent Credit Scoring helps you organise resources streamline processes and build more intelligent scorecards that will help achieve better results

**Developing and Managing Innovation in a Fast Changing and Complex World** Stig Ottosson,2018-06-27 This book provides essential insights into how to rapidly and safely develop new sustainable products no matter whether it is in the private sector the public sector or the non profit sector and regardless of the specific national or business culture The principles discussed were distilled from experiences and insights gained in numerous practical innovation endeavors and from insider action research in connection with ongoing development change management and innovation projects in various areas and branches of the business world and non commercial sector In short the practical work and research has revealed that regardless of the specific product and or business to be developed clear advantages can be gained by using dynamic or agile methods based on modern theories These advantages include reduced risk of failure shorter time to market less money and effort spent better outcome solutions etc than when classical methods are used Accordingly the book also highlights the differences between the classical traditional and dynamic mindset and approaches It offers suggestions on how to think organize lead and act in order to excel in an increasingly complex and non linear world The more you can assimilate the theories principles and methods and integrate them in the culture you operate in the greater the benefits will be for you and your organization
