Lay,2011-11-21 Linear algebra is relatively easy for students during the early stages of the course when the material is presented in a familiar concrete setting But when abstract concepts are introduced students often hit a brick wall Instructors seem to agree that certain concepts such as linear independence spanning subspace vector space and linear transformations are not easily understood and require time to assimilate Since they are fundamental to the study of linear algebra students understanding of these concepts is vital to their mastery of the subject David Lay introduces these concepts early in a familiar concrete R^n setting develops them gradually and returns to them again and again throughout the text so that when discussed in the abstract these concepts are more accessible Note This is the standalone book if you want the book access card order the ISBN below 0321399145 9780321399144 Linear Algebra plus MyMathLab Getting Started Kit for Linear Algebra and Its Applications Package consists of 0321385179 9780321385178 Linear Algebra and Its Applications 0321431308 9780321431301 MyMathLab MyStatLab Glue in Access Card 0321654064 9780321654069 MyMathLab Inside Star Sticker Instructor's Solutions Manual [to Accompany] Linear Algebra with Applications, Fourth Edition [by] Otto Bretscher Kyle Burke,George Welch,2009 Student Solutions Manual for Strang's Linear Algebra and Its Applications Strang Strang,Gilbert Strang,Brett Coonley,Andy Bulman-Fleming,2006 Includes detailed step by step solutions to selected odd numbered problems Instructor's Solutions Manual [to Accompany] Linear Algebra and Its Applications, Third Edition Update [by] David C.
