Abstract

Abstract: To explore most suitable and efficient method for the removal of dyes from textile effluent. **Methodology:** **Method of Analysis:** In this paper, maximum information of research work carried out by many researchers related to various methods for the removal of dyes from especially Disperse Blue, Direct Blue, Crystal Violet, Malachite Green and Brilliant O dyes present in textile effluent have been compiled and compared to find out cheap and effective method by calculating their percentage removal. **Conclusion:** It has been found that among all the methods reported so far, Adsorption process shows promising results and maximum about all the elements of otherwise efficient methods like adsorption, coagulation and electro coagulation are in terms of high cost and high problems. So, the use of natural adsorbents and agricultural/industrial waste materials especially modified fly ash, natural activated coal/char, activated modified charcoal, bentonite clay as adsorbents is recommended for the removal of azoic dyes since they are of less cost and easy availability and have great affinity for dyes. Moreover, agricultural/industrial waste often poses a disposal problem. So, their use (after chemical treatment) as adsorbent is environmental friendly. **Keywords:** **Biodegradability:** This review paper would be helpful to find the most promising method for the removal of azoic dyes from the textile effluent considering the merits and demerits of each method. Much work has been done to explore the most effective and cheap method for the removal of dyes, mainly but not under the range of operating conditions. In future, more methods need to be explored to study and check removal of dyes from real textile effluent at the industrial level on the dye effluent site contains other harmful pollutants. Attention is to be paid to develop cheaper and more efficient adsorbents from the agricultural/industrial waste with some modifications which would be cost effective. However, management of enhanced adsorbents is also to be taken care of.
