Chassot, 2023-12-11 This unparalleled reference work on airline liability is written and edited by internationally revered experts and presents a comprehensive article by article analysis of the Montreal Convention 1999 MC99 International and EU Aviation Law Elmar Maria Giemulla, Ludwig Weber, 2011-01-01 This book offers an extraordinary wealth of information from the ground up of the law governing and regulating air transport today with a strong emphasis on international aviation A team of distinguished authors in the field of aviation law provide a cogent synthesis from which sound legal opinions and strategies of legal action may be confidently built Among the many topics here in depth are the following definition and classification of airspace distinction between civil and state aircraft air navigation and air traffic control services airport charges and overflight charges structure of ICAO standard setting functions and audit functions of ICAO functions of the International Air Transport Association IATA policy and effects of deregulation and liberalization of air transport policy the International Registry for Aircraft Equipment air carrier liability regimes and claims procedure measures to combat aviation terrorism air piracy and sabotage and the Open Skies Agreements This publication cites significant legislation and court rulings including from the United States and the European Union where far reaching measures on market access competition and passenger rights have set trends for other regions of the world The special case of Latin America has a chapter to itself At a time when commercial aircraft have been used as lethal weapons for the first time aviation law finds itself in the front line of responsibility for maintaining global aviation security **Compendium of**

International Civil Aviation Adrianus D. Groenewege, 1996 International Aviation Law Attila Sipos, 2024-09-02 This book opens the most adventurous and passionate Chapter in the history of Humankind Aviation Aviation in our modern world is one of the latest magnificent enterprises a kind of emblematic window through which we can cast a glance into the future Into the future since the aviation industry already applies technical organisational and administrative solutions which in other walks of life will be utilised only after years or decades The airplanes have become so swift and safe that flying has

turned from a reckless adventure into public transport Next to cities airports have been built from where every minute airplanes take off and depart to all the four corners of the world The once so enormous and mysterious terrestrial globe has shrunk to appear to be a tiny ball all points of which can be reached in a couple of hours This book introduces in its entirety the regulatory regime of aviation as the safest form of transport in our age which integrates exceptional spiritual and practical achievements technical innovation as well as creates significant values Air transport is one of the most regulated industry The comprehension of its context requires the knowledge of the rules of international air law Air law is a qualitatively separated part of international law with peculiar structure which has evolved by drawing on the centuries old traditions of maritime law and has developed to be one of the youngest and the most up to date branch of jurisprudence Air law is an autonomous branch of law Its uniqueness derives from the extraordinarily rigorous requirements occasionally written by blood of aviation safety and aviation security The author guides the reader into this barely familiar secluded world of aviation via 31 illustrations and the presentation of 100 legal cases The volume relies on the several decades professional experience of the author Its objectives consist in the familiarisation of the public interested in aviation with this exceptionally intriguing area of international law in the support of the everyday work of experts in the area of aviation furthermore in the enhancement of the knowledge of theoretical and practical lawyers and broadening their horizons In this book the two most important founding treaties of international air law are introduced the Chicago Convention on International Civil Aviation 1944 and the Montreal Convention on the Unification of Certain Rules for International Carriage by Air 1999 furthermore mention is made of all significant aviation law treaties The Chicago and the Montreal Conventions are timeless sources of law since their meritorious amendment barely ensued therefore the relations and the legal solutions elucidated in the book are going to serve the reader for decades

Ratemaking in International Air Transport Peter Haanappel, 1978 Ratemaking in international air transport is a matter of vital importance for airlines consumers and Governments For airlines because the level of international air fares and rates forms one of the bases of their profit making ability For consumers because that level determines whether they can afford the use of international air transport For Governments because they as the guardians of the interests of both the airlines and the consumers have the task to strike a just balance between those interests International air fares and rates are of two kinds scheduled and non scheduled The International Air Transport Association IATA the trade association of the world's scheduled international airlines determines under Governmental supervision and control uniform fares and rates for scheduled international air services These services account for approximately seventy five percent of total international air traffic The remaining twenty five percent consists of non scheduled or charter international air services International charter air fares and rates are by and large set by the free forces of the marketplace and compete with scheduled international IATA air fares and rates This book studies both scheduled and charter international air fares and

rates It examines the role of airlines airline associations and Governments in the international ratemaking process Furthermore it analyses the competitive relationship between charter and scheduled international air fares and rates
