Executive Summary

The executive summary provides an overview of the content contained in the feasibility study document. Many people write this section after the rest of the document is completed. This section is important in that it provides a higher-level summary of the detail contained within the rest of the document.

Alan's Best Chocolates (ABC) is a leader in the sales of chocolates and confections throughout the United States. ABC's products are sold from 50 stores throughout the country and maintain a reputation for superior taste and quality. While ABC's sales have grown over the past 10 years, the rate of growth has slowed significantly. One key factor for this slowing growth rate is the shift in the marketplace to purchasing chocolates and confections online. While ABC maintains a web site, it is not capable of hosting an e-commerce platform for online sales. ABC's sales occur only in its brick-and-mortar facilities and the company is losing potential customers to competitors who provide online sales. The chocolate and confections marketplace are healthy and shows a continued growth trajectory over the next five to ten years. ABC is in a position to capitalize on this online marketplace by leveraging existing technologies, industry best practices, and an aggressive marketing and sales campaign to ramp up the company's growth projections for the foreseeable future.

Description of Products and Services

This section provides a high-level description of the products and/or services which are being considered as part of the feasibility study. The purpose of this section is to provide detailed descriptions of exactly what the organization is considering so this information can be applied to the following sections of the document. It is important that this description captures the most important aspects of the products and/or services that the organization is considering as well as how it may benefit customers and the organization.

Integrative Document & Content Management Len Asprey, Michael Middleton, 2003-01-01 Portals present unique strategic challenges in the academic environment. Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite. The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution. Building a portal is as much about constructing intra campus bridges as it is about user interfaces and content. Designing Portals Opportunities and Challenges discusses the current status of portals in higher education by providing insight into the role portals play in an institution's business and educational strategy by taking the reader through the processes of conceptualization design and implementation of the portals in different stages of development at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere.
