**How We Teach Science** John L. Rudolph, 2019-06-01 Despite an enduring belief that science should be taught there has been no enduring consensus about how or why. This is especially true when it comes to teaching scientific process. John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public. *The Chemical News and Journal of Physical Science*, 1883 **Chemical News and Journal of Physical Science**, 1883 *Sessional Papers ... of the Legislative Assembly of the Province of Ontario* ... *The Electrician*, 1901 **The Human Radiation Experiments** Advisory Committee on Human Radiation Experiments, 1996-06-06 This book describes in fascinating detail the variety of experiments sponsored by the U.S. government in which human subjects were exposed to radiation often without their knowledge or consent. Based on a review of hundreds of thousands of heretofore unavailable or classified documents this Report tells a gripping story of the intricate relationship between science and the state. Under the thick veil of government secrecy researchers conducted experiments that ranged from the mundane to such egregious violations as administering radioactive tracers to mentally retarded teenagers injecting plutonium into hospital patients and intentionally releasing radiation into the environment. This volume concludes with a discussion of the Committee's key findings and guidelines for changes in institutional review boards ethics rules and policies and balancing national security interests with individual rights. Ethicists public health professionals and those interested in the history of medicine and Cold War history will be intrigued by the findings of this landmark report.
