African Middle Classes

and Social Protest Antje Daniel, Henning Melber, Florian Stoll, 2025-11-17 This book explores class formation and political consciousness in contemporary Africa. It challenges prevailing narratives by examining the nuanced emergence of middle class identities across Africa since the early 2000s. Initially viewed through a narrow economic lens focused on income thresholds, the concept of an African middle class has evolved into a rich field of inquiry. This collection moves past superficial analyses to explore the lived experiences, political orientations, and social consciousness of these diverse groups. Through meticulously researched case studies spanning multiple countries, contributors from sociology, anthropology, and political science reveal the fragile and contradictory nature of middle class formation in Africa. The volume interrogates how factors beyond economic criteria, including education, consumption patterns, cultural capital, and political engagement, shape class identity and social movements. This essential text demystifies uncritical notions of African middle classness while providing empirical depth to our understanding of how these emerging social segments navigate complex sociopolitical landscapes. Scholars and students of development studies, African Studies, and class analysis will find this collection indispensable for understanding the intersection of class formation and political consciousness in contemporary Africa. The chapters in this book were originally published as a special issue of *Journal of Contemporary African Studies*. *Campus Student Activism, Politics, and Citizenship in the 21st Century* Tshishonga, Ndakhulu, 2025-04-03 Student activism and citizenship remain an integral part of the governance of academic institutions, democratizing the learning environment and advancing democratic values and societal change. As a result, student activism has become a key aspect of the global higher education landscape. Individually and through the student councils, students have been at the forefront fighting for social justice and equality inside their academic institutions and in larger society by fusing activism with citizenship. Through student activism and citizenship, students demonstrate their power to keep governments responsible and in redirecting the voices of students in higher education's decision-making processes. Further exploration may afford students the opportunity to influence social change by partaking in educational policy reforms and broadening global sociopolitical and economic growth. *Campus Student Activism, Politics, and Citizenship in the 21st Century* examines the dynamics of campus politics through student activism and citizenship perspectives, academia, public, private, and civil society sectors. It explores how student leadership engages university society stakeholders, including management and governance structures and student welfare and institutional policy reformation in defense of the rights and interests of students. This book covers topics such as higher education, political engagement, and social justice and is a useful resource for policymakers, government officials, sociologists, political scientists, academicians, and researchers. *Kenya Yearbook*, 2010 *Journal of Soil and Water Conservation*, 2015 Vol 25 no 1 contains the society's Lincoln Chapter's Resource conservation glossary. *Kenyatta University*, 2010 **The Battle of the Villages** Kenyatta University, Nduhiu Change, Southern African Development Community.
