

# Field Trip Reports

## Objective

The main objective is to learn about a care facility by applying a conceptual framework to analyze the environment. Below we present a three dimensional framework to highlight the critical factors / elements to pay attention to when you participate in the field trip. Please use the framework to write 4-5 paragraphs summarizing your impressions. We are not expecting a long and comprehensively researched document.

## Three Dimensions

Your written report should attempt to address the three dimensions below, namely work-flow, system and interactions, and key criteria and means to determine care improvement.

**Work-flow:** We are highly interested in the general work-flow of the environment and patient- to-care provider interactions. The IT system is embedded in the larger system of the health care organization and it would be interesting to comment, broadly, on the work-flow of the environment as a patient would experience it. Some key questions to consider are: Who are people the patient interacts with, what types of data are collected, and what information systems are used for monitoring and treating patients.

**System and Interactions:** Based on what you've observed, describe the strengths and weaknesses of the existing EHR system. Specifically, address the following:

1. Data input
2. Data retrieval
3. Decision support
4. Order entry
5. Registry functionality

Assessment for Experiential Learning Cecilia Ka Yuk Chan,2022-09-29 Chan s book explores the challenges in assessing experiential learning deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential learning Experiential learning has been studied and proven to be effective for student learning particularly for the development of holistic competencies i e 21st century skills soft skills transferable skills considered essential for individuals to succeed in the increasingly global and technology infused 21st century society Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences however the assessment of these programmes tends to be limited unclear and contested Assessment plays a central role in education policies and students approach to learning But do educators know how to assess less traditional learning such as service learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law languages science and social studies there is a lack of assessments and research that focus on holistic competencies How do we assess students ability to think critically problem solve adapt self manage and collaborate Central to the discussion in this book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes Offering a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in experiential learning from students teachers and policymakers The idea of assessment literacy also plays an important role in experiential learning for example reflection is often used in assessing students in experiential learning but how reflection literate are educators are they aware of the ethical dilemmas

that arise in assessing students These questions are discussed in detail The volume also introduces a quality assurance programme to recognise student development within experiential learning programmes The book will be particularly informative to academic developers teachers students and community partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular assessment designs and quality assurance The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *ProPack II* Valerie Stetson, Susan Hahn, David Leege, Debbie Reynolds, Guy Sharrock, 2007-04-09 [Project Management for Archaeology](#) Rodrigo Vilanova, Timothy J.
