Shape Perception in Human and Computer Vision Sven J. Dickinson,Zygmunt Pizlo,2013-06-29 This comprehensive and authoritative text reference presents a unique multidisciplinary perspective on Shape Perception in Human and Computer Vision Rather than focusing purely on the state of the art the book provides viewpoints from world class researchers reflecting broadly on the issues that have shaped the field Drawing upon many years of experience each contributor discusses the trends followed and the progress made in addition to identifying the major challenges that still lie ahead Topics and features examines each topic from a range of viewpoints rather than promoting a specific paradigm discusses topics on contours shape hierarchies shape grammars shape priors and 3D shape inference reviews issues relating to surfaces invariants parts multiple views learning simplicity shape constancy and shape illusions addresses concepts from the historically separate disciplines of computer vision and human vision using the same language and methods    **Sensory Ecology of Plant-Pollinator Interactions** Casper J. Van Der Kooi,Sara Diana Leonhardt,Johannes Spaethe,2022-09-07

**Proceedings of the 11th International Conference on Production Research - Americas** Fernando Deschamps,Edson Pinheiro de Lima,Sérgio E. Gouvêa da Costa,Marcelo G. Trentin,2023-07-26 This book presents the proceedings of the conference and provides valuable insights into the issues facing Small and Medium Enterprises SMEs particularly in the areas of sustainable operations and digitalization It comprises a series of papers presented at the conference covering topics such as challenges faced by SMEs in a post pandemic era digitalization and its impact on SMEs sustainable operations in SMEs international market performance improvement in SMEs SMEs infrastructure and integration with research development and innovation institutions and SMEs participation in business networks The papers offer a unique perspective on the challenges and opportunities facing SMEs and provides practical solutions for those looking to help their organizations thrive in a rapidly changing business environment    **Can We Believe It?** George Arthur Frederick Seber,2016-03-21 Many people today believe that Christianity will not stand up to a scientific or intellectual investigation and that science has all the answers Such an attitude shows an ignorance of the wealth of available philosophical arguments and scientific information that Dr Seber taps into in this book Initially he shows that mathematics and science are limited in what they can prove in spite of modern advances He then summarizes his material using basic questions as ten chapter headings Does God exist is there a spiritual dimension do we have free will is the Bible reliable who is Jesus do miracles occur why does God allow suffering and evil is Christianity a blessing or a curse to society what about evolution and how can we get to

know God The reader may have other questions and a number are considered within each chapter such as problems with philosophical materialism and atheism He draws his material from many sources including statistics physics cosmology genetics philosophy history biochemistry theology psychology archaeology and biology Comparatively new subjects like epigenetics chaos theory and quantum mechanics that many people are not aware of are brought into the picture These topics change our thinking about reality

**From Ecology to Brain Development: Bridging Separate Evolutionary Paradigms** Francisco Aboitiz,Miguel L. Concha,Christian González-Billault,Jorge Mpodozis,2018-09-14 The nervous system is the product of biological evolution and is shaped by the interplay between extrinsic factors determining the ecology of animals and by intrinsic processes that dictate the developmental rules that give rise to adult functional structures This special topic is oriented to develop an integrative view from behavior and ecology to neurodevelopmental processes We address questions such as how do sensory systems evolve according to ecological conditions How do neural networks organize to generate adaptive behavior How does cognition and brain connectivity evolve What are the developmental mechanisms that give rise to functional adaptation Accordingly the book is divided in three sections i Evolution of sensorimotor systems ii Cognitive computations and neural circuits and iii Development and brain evolution We hope that this initiative will support an interdisciplinary program that addresses the nervous system as a unified organ subject to both functional and developmental constraints where the final outcome results of a compromise between different parameters rather than being the result of several single variables acting independently of each other
